The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for. This includes understanding their work-life balance, their preferred work environment, and their preferred work schedule.

The way to build a hybrid work model is to start with the people and work backwards. This means understanding what people want and then designing a hybrid work model that meets those needs.

How do you know if you've built a successful hybrid work model? The answer is simple: if you've built a hybrid work model that meets the needs of the people you want to work for, then you've built a successful hybrid work model.
