Observatories in Earth Orbit and Beyond Y. Kondo, 2012-12-06 When I became President of International Astronomical Union Commission 44 for the triennial period 1985-1988 several members of the Organizing Committee and I agreed that it would be a good idea for our Commission to host a conference on observatories in space in view of their increasingly important role in astronomical research IAU Colloquium Number 123 Observatories in Earth Orbit and Beyond is the first colloquium sponsored by IAU Commission 44 on Astronomy from Space although Commission 44 has co-sponsored numerous colloquia and symposia in the past The past two decades have seen a flourishing of astronomical observatories in space Over a dozen orbiting observatories have opened up a new window on the universe providing hitherto unavailable data in the electromagnetic spectral range from gamma ray X ray ultraviolet to infrared and radio This has clearly demonstrated the crucial nature of astronomical observations from space The invited talks of present colloquium consist primarily of reviews of currently operating observatories in space future observatories that have been approved by sponsoring government or space agencies the launch systems of USA ESA USSR and Japan discussions of various orbits and sites such as the Moon and alternate approaches in designing space observatories Several panel discussions addressed those issues as well as the major unsolved problems of astronomy Contributed poster papers included descriptions of space observatories that are in planning stage

The Saga of Rocket Science series gives a thorough expos of the U S Apollo and Space Shuttle programs You will be there as Gus Grissom Ed White and Roger Chaffee perish and get incinerated inside their locked Apollo 1 capsule when Jim Lovell Jack Swigert and Fred Haise didn t know if they would make it back alive aboard a freezing lunar module on Apollo 13 as Neil and Buzz experienced the euphoria of being the first humans to land on the Moon while Mike Collins in lunar orbit and an anxious world looked on You ll see the same panoramic vistas of the lunar landscape and the beautiful blue marble we call Earth as the astronauts saw You are taken inside the Challenger Space Shuttle as it caught fire and disintegrated in flight What seven brave astronauts felt like as they plunged to their deaths in a basically intact crew cockpit You ll understand exactly what failed and how it failed on both the Challenger and the ill fated Columbia space shuttles and why another seven astronauts aboard the Columbia felt no pain despite their grisly annihilation during reentry
