Form and Space of Japanese Architecture Norman F. Carver,1962 □□ ,2010-03 **House and Home in Modern Japan** Jordan Sand,2005 A house is a site the bounds and focus of a community It is also an artifact a material extension of its occupants lives This book takes the Japanese house in both senses as site and as artifact and explores the spaces commodities and conceptions of community associated with it in the modern era As Japan modernized the principles that had traditionally related house and family began to break down Even where the traditional class markers surrounding the house persisted they became vessels for new meanings as housing was resituated in a new nexus of relations The house as artifact and the artifacts it housed were affected in turn The construction and ornament of houses ceased to be stable indications of their occupants social status the home became a means of personal expression and the act of dwelling was reconceived in terms of consumption Amid the breakdown of inherited meanings and the fluidity of modern society not only did the increased diversity of commodities lead to material elaboration of dwellings but home itself became an object of special attention its importance emphasized in writing invoked in politics and articulated in architectural design The aim of this book is to show the features of this culture of the home as it took shape in Japan **Space** Michael Freeman,2004 In ultra crowded Japan the constraints of space and form inspire rather than confound That is readily apparent in this fascinating volume featuring impossibly tiny narrow odd shaped habitats that have been transformed into peaceful elegant oases through the innovative use of light openness and visual harmony **Form and Space of Japanese Architecture. Photos by Norman F. Carver. Japanese Translation by Ryuichi Hamaguchi** Norman F. Carver,1955 **Form and Space of Japanese Architecture** Norman F. Carver,1955 Contemporary Japanese Architecture James Steele,2017-03-16 Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation

of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture *Rediscovering Japanese Space* Kishō Kurokawa,1988

Japan, Climate, Space and Concept Koji Yagi,1981 Frank Lloyd Wright and Japan Kevin Nute,2000 Looks at Wright's formal and philosophical debt to Japanese art and architecture Eight areas of influence are examined in detail from Japanese prints to specific individuals and publications and are illustrated with text and drawn analyses **The Constructed Other: Japanese Architecture in the Western Mind** Kevin Nute,2021-09-30 The Constructed Other argues that the assumed otherness of Japanese architecture has made it both a testbed for Western architectural theories and a source of inspiration for Western designers The book traces three recurring themes in Western accounts of Japanese architecture from the reopening of Japan in the mid nineteenth century to the present day a wish to see Western architectural theories reflected in Japanese buildings efforts to integrate elements of Japanese architecture into Western buildings and a desire to connect contemporary Japanese architecture with Japanese tradition It is suggested that together these narratives have had the effect of creating what amounts to a mythical version of Japanese architecture often at odds with historical fact but which has exercised a powerful influence on the development of building design internationally Urban Spaces in Japan Christoph Brumann,Evelyn Schulz,2012-06-14 Urban Spaces in Japan explores the workings of power money and the public interest in the planning and design of Japanese space Through a set of vivid case studies of well known Japanese cities including Tokyo Kobe and Kyoto this book examines the potential of civil society in contemporary planning debates Further it addresses the implications of Japan's biggest social problem the demographic decline for Japanese cities and demonstrates the serious challenges and exciting possibilities that result from the impending end of Japan's urban growth Presenting a synthetic approach that reflects both the physical aspects and the social significance of urban spaces this book scrutinizes the precise patterns of urban expansion and shrinkage In doing so it also summarizes current theories of public space urban space and the body in space which are relevant to both Japan and the wider international debate With detailed case studies and more general reflections from a broad range of disciplines this collection of essays demonstrates the value of cross disciplinary cooperation As such it is of interest to students and scholars of geography and urban planning as well as history anthropology and cultural studies *The Making of a Modern Japanese Architecture* David B. Stewart,1987 This text explores the rise of modern architecture in Japan since 1868 and the interaction between tradition and innovation East and West **The Very Small Home** Azby Brown,2005 Building small can be a sign of higher ambitions and those who take the time to peruse these pages will undoubtedly grow to appreciate that creating a small home can be an amazingly positive and

creative act one which can enhance life in surprising ways The Very Small Home presents stunning design advances in Japan Eighteen recent houses from ultramodern to Japanese rustic are explored in depth Particular emphasis is given to what the author call the Big Idea the overarching concept that does the most to make the house feel more spacious than it actually is Among the Big Ideas introduced here are ingenious sources of natural light well thought out atriums snug but functional kitchens unobtrusive partitions and free flowing circulation paths An introduction by the author puts the house designs in the context of lifestyle trends and highlights their shared characteristics For each project the intentions of the designers and occupants are examined The result is a very human sensibility that runs through the book A glimpse of the dreams and aspirations that these unique homes represent and that belies their apparent modesty The second half of the book is devoted to illustrating the special features in the homes from clever storage and kitchen designs to ingenious skylights and nooks As with his earlier Small Spaces Azby Brown has given home owners designers and architects a fascinating new collection of thought provoking ideas
