The Interplay Between Gender, Markets and the State in Sweden, Germany and the United States Lilja Mosesdottir, 2024-11-01 This title was first published in 2001 The development of gender relations during the post war period in Sweden Germany and the US forms the core of this work It looks at the hierarchical relations between men and women based on economic political social and biological differentiations The analytical focus is primarily on how actors cultural norms and institutional arrangements interrelate and affect the relative position of men and women to create patterns forms of gender relations that vary across countries and change through time The main advantages of a comparative study is that it highlights the differences and similarities of the countries being compared This book argues that social blocks involving a stable system of relations that have challenged and become embedded into institutional arrangements are the main force creating differences in the patterns of gender relations across the countries [The New Regulatory State](#) L.

G. Tilak, 2017-10-16 This book critically examines some of the major trends in the development of higher education It demonstrates how in the context of liberalisation globalisation and marketisation the crisis in higher education has assumed different dimensions in all advanced and emerging societies The author shows how the state tends to slowly withdraw from the responsibility of higher education including in the arena of policy making or simply adopts a policy of laissez faire of non involvement which helps in the rapid unbridled growth of private sector in higher education The notion of higher education as a public good is under serious contestation in current times The book argues for the need to resurrect the compelling nature of higher education along with its several implications for public policy and planning while providing a broad portrayal of global developments comparative perspectives and key lessons The volume will be of interest to scholars and researchers of education political science public policy and administration governance development studies economics and those working in the higher education sectors think tanks policymakers as well as NGOs Administrative Law and Politics Christine B.
