The greatest drivers of change over the last 50 years

On land and in freshwater:

- Agricultural management
- Climate change

At sea and around our coasts:

- Unsustainable fishing
- Climate change
- Marine development

These drivers continue from centuries of habitat loss, development and persecution.

The UK is one of the most nature depleted countries on Earth.

The UK's ambitious targets to address nature loss:

- Improve species status
- Increase nature-friendly farming, fisheries and forestry
- Expand and manage protected areas
- Increase ecosystem restoration
- Co-ordinate our response to the nature and climate crises

Conservation actions deliver results for nature

In Lyme Bay Marine Protected Area, the number of species has increased since trawling was banned in 2008

Natterjack Toad populations have stabilised or expanded at sites where conservation management has been well-resourced

Large-scale restoration projects, such as Cairngorms Connect, are helping to benefit many woodland-dependent species

We have never had a better understanding of the State of Nature and what is needed to fix it

Helen Thornton,2005 State of Nature or Eden Thomas Hobbes and his Contemporaries on the Natural Condition of Human Beings aims to explain how Hobbes s state of nature was understood by a contemporary readership whose most important reference point for such a condition was the original condition of human beings at the creation in other words in Eden The book uses ideas about how readers brought their own reading of other texts to any reading that reading is affected by the context in which the reader reads and that the Bible was the model for all reading in the early modern period It combines these ideas with the primary evidence of the contemporary critical reaction to Hobbes to reconstruct how Hobbes s state of nature was read by his contemporaries The book argues that what determined how Hobbes s seventeenth century readers responded to his description of the state of nature were their views on the effects of the Fall Hobbes s contemporary critics the majority of whom were Aristotelians and Arminians thought that the Fall had corrupted human nature although not to the extent implied by Hobbes s description Further they wanted to look at human beings as they should have been or ought to be Hobbes on the other hand wanted to look at human beings as they were and in doing so was closer to Augustinian Lutheran and Reformed interpretations which argued that nature had been inverted by the Fall For those of Hobbes s contemporaries who shared these theological assumptions there were important parallels to be seen between Hobbes s account and that of scripture although on some points his description could have been seen as a subversion of scripture The book also demonstrates that Hobbes was working within the Protestant tradition as well as showing how he used different aspects of this tradition Helen Thornton is an Independent Scholar She completed her PhD at the University of Hull **Roman Law in the State of Nature** Benjamin Straumann,2015-02-12 Roman Law in the State of Nature offers a new interpretation of the foundations of Hugo Grotius natural law theory Surveying the significance of texts from classical antiquity Benjamin Straumann argues that certain classical texts namely Roman law and a specifically Ciceronian brand of Stoicism were particularly influential for Grotius in the construction of his theory of natural law The book asserts that Grotius a humanist steeped in Roman law had many reasons to employ Roman tradition and explains how
