Statistical Optimization For Geometric Computation Theory And Practice:

Statistical optimization for geometric computation Kenichi Kanatani,2005 Statistical Optimization for Geometric Computation Kenichi Kanatani,2005-07-26 This text for graduate students discusses the mathematical foundations of statistical inference for building three dimensional models from image and sensor data that contain noise a task involving autonomous robots guided by video cameras and sensors The text employs a theoretical accuracy for the optimization procedure which maximizes the reliability of estimations based on noise data The numerous mathematical prerequisites for developing the theories are explained systematically in separate chapters These methods range from linear algebra optimization and geometry to a detailed statistical theory of geometric patterns fitting estimates and model selection In addition examples drawn from both synthetic and real data demonstrate the insufficiencies of conventional procedures and the improvements in accuracy that result from the use of optimal methods Statistical Optimization for Geometric Computation: Theory and Practice Ken'ichi Kanatani,1996-03-14 This book discusses mathematical foundations of statistical inference for building a 3 D model of the environment from image and sensor data that contain noise a central task for autonomous robots guided by video cameras and sensors A theoretical accuracy bound is derived for the optimization procedure for maximizing the reliability of the estimation based on noisy data and practical computational schemes that attain that bound are derived Many synthetic and real data examples are given to demonstrate that conventional methods are not optimal and how accuracy improves if truly optimal methods are employed Institutions to benefit from this book include University departments related to computer science information processing image processing robotics and mechatronics governmental research organizations for computer related advanced technology and corporate laboratories of computer and electronic industries
