Statistics for the Behavioral Sciences Bryan Raudenbush, 2003-12-30. *Statistics for the Behavioral Sciences* is a short course and student manual in statistics for the behavioral sciences. It is comprehensive in that it contains all information necessary to learn basic statistical analysis with a focus on the use of statistics for behavioral sciences research. Emphasis is placed on a clear presentation of statistical formulas, appropriateness of particular tests, and outcome analysis. Author Bryan Raudenbush presents theory, statistical procedures, and practical application using a module approach to provide a concise summary of the necessary data requirements, statistical procedures, and outcome interpretation. The workbook format of the text allows for students to complete examples and exercises within the pages of the textbook.

*Fundamental Statistics for Behavioral Sciences* Robert B. McCall, 1998. This text takes a traditional approach to teaching the basic statistical concepts and methods used in behavioral research. McCall emphasizes building an understanding of the logic of statistics rather than stressing the mechanics. Similarly, the data for computational problems has been kept simple so students can focus on the rationale and outcome of techniques instead of the calculations themselves.
