The Art of Discovery Margareth Hagen,Randi Koppen,Margery Vibe Skagen,2010-08-30 This anthology brings together scholars from literature the natural sciences and the philosophy of science to present new perspectives on the relations between literary and scientific communities Drawing on literature spanning the 19th and 20th centuries as well as Europe and the Americas the authors explore how science has been portrayed from the perspective of literature at different times and in different places as challenge or opportunity promise or scandal The disturbance of science emanates perhaps from its association with a frightening future or its ability to change the appearance of the past the scandal occurs as it recalls us to thresholds and hybrids human and non human animal and machine Science however also emerges as a source of metaphor and imaginative modelling of encodings and decodings representations and discoveries Less prominent in the collection though no less important is the view on how scientific cultures portray literature or the literary academic and how science reflects on itself

Grammar, Gesture, and Meaning in American Sign Language Scott K. Liddell,2003-03-13 In sign languages of the deaf some signs can meaningfully point toward things or can be meaningfully placed in the space ahead of the signer This obligatory part of fluent grammatical signing has no parallel in vocally produced languages This book focuses on American Sign Language to examine the grammatical and conceptual purposes served by these directional signs It guides the reader through ASL grammar the different categories of directional signs the types of spatial representations signs are directed toward how such spatial

conceptions can be represented in mental space theory and the conceptual purposes served by these signs The book demonstrates a remarkable integration of grammar and gesture in the service of constructing meaning These results also suggest that our concept of language has been much too narrow and that a more comprehensive look at vocally produced languages will reveal the same integration of gestural gradient and symbolic elements
