What Babies Know Elizabeth Spelke, 2022 What do infants know and how does the knowledge that they begin with prepare them for learning about the particular physical cultural and social world in which they live Answers to this question shed light not only on infants but on children and adults in all cultures because the core knowledge possessed by infants never goes away Instead it underlies the unspoken common sense knowledge of people of all ages in all societies By studying babies researchers gain insights into infants themselves into older children s prodigious capacities for learning and into some of the unconscious assumptions that guide our thoughts

and actions as adults To share these insights Spelke distils the findings from research in developmental comparative and cognitive psychology with excursions into studies of animal cognition in psychology and in systems and cognitive neuroscience and studies in the computational cognitive sciences Weaving across these disciplines she paints a picture of what young infants know and what they quickly come to learn about objects places number geometry and people s actions social engagements and mental states *Infants and Children's Wear Review* ,1927 **A manual of collective lessons in plain needlework and knitting, partly original and partly ed. from the Germ. of J.
