Impossible Minds: My Neurons, My Consciousness (Revised Edition) Igor Aleksander, 2014-12-18 Impossible Minds My Neurons My Consciousness has been written to satisfy the curiosity each and every one of us has about our own consciousness It takes the view that the neurons in our heads are the source of consciousness and attempts to explain how this happens Although it talks of neural networks it explains what they are and what they do in such a way that anyone may understand While the topic is partly philosophical the text makes no assumptions of prior knowledge of philosophy and so contains easy excursions into the important ideas of philosophy that may be missing in the education of a computer scientist The approach is pragmatic throughout there are many references to material on experiments that were done in our laboratories The first edition of the book was written to introduce curious readers to the way that the consciousness we all enjoy might depend on the networks of neurons that make up the brain In this second edition it is recognized that these arguments still stand but that they have been taken much further by an increasing number of researchers A post script has now been written for each chapter to inform the reader of these developments and provide an up to date bibliography A new epilogue has been written to summarize the state of the art of the search for consciousness in neural automata for researchers in computation students of philosophy and anyone who is fascinated by what is one of the most engaging scientific endeavours of the day This book also tells a story A story of a land where people think that they are automata without much in the way of consciousness a story of cormorants and cliffs by the sea a story of what it might be like to be a

presents an ecological understanding of heritage that furthers a concern for how its making and unmaking always involves a wide range of human and other than human actors Recognizing the entangled nature cultures of heritage is essential in the Anthropocene era where uncertainty and rapid environmental change force us to recast common conceptions of inheritance and to envision new strategies for preservation Heritage sites are meant to be open and shared spaces and a recurring argument in the cases presented here is that this openness inevitably also overrides our selections orders and appreciations Through a diverse range of case studies the chapters collected in this book aim to explore the affects and memories engendered by diverse heritage ecologies where humans are neither the sole makers nor the only inheritors The common call is that the experiential perceptive and informational plenitude enabled through contributions of other than human actors is key to an ecological rethinking of heritage in the twenty first century Heritage Ecologies is unique in bringing heritage studies into closer proximity with a wide variety of non representational and object oriented theories and is an important volume for students and researchers in archaeology and heritage studies [Saturday Review of Politics, Literature, Science and Art](#) ,1917 **Plays of G.
