editor the book shows scientists and students how to present their research in a way that is clear and that will maximize reader comprehension The book takes an integrated approach using the principles of story structure to discuss every aspect of successful science writing from the overall structure of a paper or proposal to individual sections paragraphs sentences and words It begins by building core arguments analyzing why some stories are engaging and memorable while others are quickly forgotten and proceeds to the elements of story structure showing how the structures scientists and researchers use in papers and proposals fit into classical models The book targets the internal structure of a paper explaining how to write clear and professional sections paragraphs and sentences in a way that is clear and compelling The ideas within a paper should flow seamlessly drawing readers along The final section of the book deals with special challenges such as how to discuss research limitations and how to write for the public Writing Science is a much needed guide to succeeding in modern science Its insights and strategies will equip science students scientists and professionals across a wide range of scientific and technical fields with the tools needed to communicate effectively
