FDR and the Soviet Union Mary E. Glantz,2005 Throughout his presidency Franklin Roosevelt was determined to pursue a peaceful accommodation with an increasingly powerful Soviet Union an inclination reinforced by the onset of world war Roosevelt knew that defeating the Axis powers would require major contributions by the Soviets and their Red Army and so despite his misgivings about Stalin s expansionist motives he pushed for friendlier relations Yet almost from the moment he was inaugurated lower level officials challenged FDR s ability to carry out this policy Mary Glantz analyzes tensions shaping the policy stance of the United States toward the Soviet Union before during and immediately after World War II Focusing on the conflicts between a president who sought close relations between the two nations and the diplomatic and military officers who opposed them she shows how these career officers were able to resist and shape presidential policy and how their critical views helped shape the parameters of the subsequent Cold War Venturing into the largely uncharted waters of bureaucratic politics Glantz examines overlooked aspects of wartime relations between Washington and Moscow to

highlight the roles played by U S personnel in the U S S R in formulating and implementing policies governing the American Soviet relationship She takes readers into the American embassy in Moscow to show how individuals like Ambassadors Joseph Davies Lawrence Steinhadt and Averell Harriman and U S military attaches like Joseph Michela influenced policy and reveals how private resistance sometimes turned into public dispute She also presents new material on the controversial military attach lend lease director Phillip Faymonville a largely neglected officer who understood the Soviet system and supported Roosevelt s policy Deftly combining military with diplomatic history Glantz traces these philosophical and policy battles to show how difficult it was for even a highly popular president like Roosevelt to overcome such entrenched and determined opposition Although he reorganized federal offices and appointed ambassadors who shared his views in the end he was unable to outlast his bureaucratic opponents or change their minds With his death anti Soviet factions rushed into the policymaking vacuum to become the primary architects of Truman s Cold War containment policy A case study in foreign relations high level policymaking and civil military relations FDR and the Soviet Union enlarges our understanding of the ideologies and events that set the stage for the Cold War It adds a new dimension to our understanding of Soviet American relations as it sheds new light on the surprising power of those in low places *Soviet Aircraft and Aviation, 1917-1941*

The Department of State Bulletin ,1957 The official monthly record of United States foreign policy **Early Soviet Jet Fighters** Yefim Gordon,Dmitriy Komissarov,2014-04 By the end of the Second World War the USA and Great Britain had developed viable jet fighters even if these aircraft came a bit too late to have a significant impact on the course of the conflict Germany achieved greater success using the Me 262 and He 162 jet fighters

operationally in the closing stages of the war. In contrast the Soviet Union lagged behind even though research on turbojet engines had begun in the USSR in the late 1930s. This deficiency was recognized and at the end of the war captured German jet aircraft and engines enabled the USSR to reverse engineer the technology. Even so the USSR struggled to catch up until in 1946 the British Labor government gifted the Soviets the latest in propulsion technology the Rolls Royce Nene and Derwent V engines. This inexplicable action allowed a much more capable generation of Soviet jet fighters to be born and by the end of the 1940s Soviet industry had caught up with and in some respects surpassed the West in jet aviation. Because of the Stalinist era in which the first Soviet jets were developed up until now little has been known about the early post war designs from the design bureaus of Mikoyan Yakovlev Lavochkin Sukhoi and Alekseyev and the background to even relatively well known types such as the MiG 9 La 9 and YAK 15 is barely documented. Other early jet types proposals and projects were virtually unknown in the West. This gap is now redressed by the famous Soviet aviation historian Yefim Gordon and in his latest work he draws on extensive research in design bureau files official documents and military archives many of which have only very recently become available having been labelled Top Secret for decades. This volume presents in considerable detail the development history and technical specifications of the earliest Soviet jet fighters and the extensive illustrations around 750 photos over 50 specially commissioned color drawings and a host of line drawings are mostly from previously classified sources the majority of which are previously unseen. This book is certain to be essential reading for aviation historians enthusiasts and modelers.

Early Jet Fighters 1944-1954 Leo Marriott, 2020-03-30. In his previous book on early jet fighters Leo Marriott traced the history of the revolutionary aircraft produced by the British and Americans immediately after the Second World War. In this companion volume he describes jet fighter development on the continent of Europe and in the Soviet Union during the same remarkable period. Using over 200 archive photographs he covers the pioneering German designs then the range of experimental and operational fighters constructed by the Soviets the French and the Swedes. The sheer variety of the designs that manufacturers came up with during this short intense period of innovation mean that the book is fascinating reading. Several of the most famous jet fighters feature prominently in the rare photographs and are analysed in the expert text including the Messerschmitt Me 262 the Heinkel He 162 the MiGs 15 17 and 19 the Dassault Ouragan and the Saab J29. But perhaps the most rewarding aspect of the book is its record of experimental projects which tested new concepts that rapidly became established elements of jet aircraft design. The photographs of these largely forgotten aircraft give us an insight into the extraordinary technical challenges and the ambition and inventiveness of the

designers and manufacturers who overcame them

Aerofax: Sukhoi Su-7/17/22 Yefim Gordon, 2004-05 Thorough Aerofax series coverage is given here to the Fitter family of Soviet fighters and fighter bombers with masses of fresh information and images emerging from previously unseen Russian sources The Su 7 was first flown in 1958 with deliveries to the Soviet Air Force beginning in the same year It could be seen as the Soviet contemporary of the F 100 Super Sabre The original high speed highly maneuverable single seat fighter was developed in several versions and produced in large numbers for the VVS and Warsaw Pact countries during the 1960s It was developed in the late 1960s with a completely new variable sweep wing as the Su 17 fighter bomber again further modified during its long life to take on many other roles including reconnaissance training and so on The Su 22 was an export version of the Su 17 and the Fitter family has served with many air forces in Europe Libya Peru Vietnam and Syria
