*Statistics for Applied Problem Solving and Decision Making* Richard Larsen, Morris Marx, Bruce Cooil, 1997-01-01

Statistics for Applied Problem Solving and Decision Making Richard J. Larsen, Morris L. Marx, Bruce Cooil, 1997 Intended for the applied calculus based introductory statistics course for business and economics undergraduates and MBAs this book presents business statistics as a problem solving process rather than as a means to achieve a numerical solution Applied data driven and computer oriented it emphasizes the principles of statistics as a foundation for application of statistical methodologies and real life problems Curve fitting and regression are introduced early allowing students to use the computer from the start of the course Statistical and spreadsheet software help students make the connections between probability models and actual data The authors include sparing and careful use of calculus at critical points where a simple calculus reference or computation can totally eliminate the perplexing arbitrariness that is seen in cookbook approaches *Catalog of Copyright Entries. **Statistical Thinking for Managers** David K. Hildebrand, Lyman Ott, 1998 Focusing on the analysis of data using modern statistical and spreadsheet software Hildebrand and Ott emphasize making sense of data and discuss not only how a statistical method is applied but why and why not Throughout the book the authors integrate computer use into the development of statistical concepts emphasizing the value of looking at data to make sure the right questions are being asked The real life applications and examples throughout challenge students to think like managers The case that concludes every chapter asks students to deal with a relatively unstructured situation and to explain the statistical reasoning in nontechnical language Modern statistical methods including resampling and bootstrapping are included In addition the authors emphasize quality control and improvement throughout the book and include three full chapters on regression and correlation methods
