Kaiser, 1986-01-01      Bulletin Illinois Association of Teachers of English, 1929      Demystifying Academic Writing in Higher Education: A Process View on Academic Textual Production Xinghua Liu, Rui Alexandre Alves, Angelique Aitken, Josef Schmied, 2025-10-30 Academic writing in this Research Topic refers to the type of writing demonstrating students' disciplinary knowledge of and proficiency in synthesizing analyzing and responding critically to new information Hyland 2004 Swales 1990 which may include those genres like course essays project reports research proposals lab notes journal articles conference papers theses and dissertations As the current workplaces have become increasingly specialized higher education worldwide has been increasingly charged with the task of developing students' academic writing and correspondingly on students' parts learning through writing has been necessary for them to succeed in higher education To prepare university students for writing challenges during the past decades numerous studies have been devoted to the study of linguistic and rhetorical resources in students' academic writing under such umbrella terms like style reader awareness authorial voice writers' identity stance

evaluation textual structures steps and moves Charles Hunston Hinkel 2002 However previous research on academic writing has been predominantly focused on the linguistic and rhetorical aspects namely the final product of students writing while the nature and processes of composition students engagement and individual differences and the influence of contextual factors like emerging technology have been under explored Thus the goal of this Research Topic is to bring a process oriented and dynamic perspective to the study of textual production in academic contexts by both encouraging an expanded view of existing research paradigms and also welcoming novel approaches Data can be collected by using corpus building interviews and questionnaires but we would also welcome the use of experimental methods and a mixed method approach for data collection Meanwhile previous research mainly studied university students who were learning English as a second or foreign language hence we also welcome research examining first language writers and students who are learning a second or foreign language other than English We believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction 5 Student writers textual production peer feedback and interactions with discourse communities 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education

**Expository Writing** Maurice Garland Fulton,1930 *Aims and Modes in the Writing Process* Polnac,Lennis Polnac,George J. Wilkerson,1992 This textbook has gone through a number of transformations since the first edition basic assumptions about the nature of communication and writing have remained unchanged Still adhere to the theory that writing involves an understanding of both purpose and organization or aims and mode We are convinced that a recognition of these concepts will aid student writers in achieving their various writing goals both in college and later in their careers Because most writing instruction is indirect the aims and modes can be a means for students to organize and understand what they read The student s own writing then becomes a part of the body of written material which he or she reads Editing then becomes a matter of reading what one has written identifying the aim and mode and rewriting it to make it better achieve the aim Pref

**The Literary Digest International Book Review** Clifford Smyth,1923 Columbia Alumni News ,1913

**An Introduction to Social Psychology** Luther Lee Bernard,1926 The present Introduction to Social Psychology represents an attempt at a more synthetic type of treatment of the field than has ordinarily been given It seems to the writer that the time has arrived when schools of social psychology may properly be regarded as obsolete and the subject as a whole may be presented systematically In a sense social psychology overlaps a very large portion of social science and of psychology and education In this respect it is central to all psychological and social science disciplines This fact necessarily renders the content of social psychology voluminous It is no longer possible to treat this subject adequately in small compass The text books which have so far appeared although for the most part excellent from their several viewpoints are

nevertheless but partial treatments So notably true is this that there exists a marked controversy as to what properly constitutes social psychology In Part I of this volume an attempt has been made to bring this controversy into relief for the purpose of enabling the reader to see the subject as a whole Originally the writer intended to publish this volume in five parts to make the synthetic treatment more pronounced But the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat The synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment Throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory following directly upon the introductory course in sociology in departments sociology If the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology economics politics and more advanced courses in history and literature in those departments which care to use it in this way That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted While the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published Preface PsycINFO Database Record c 2006 APA all rights reserved WPA, Writing Program Administration ,1985
