Thoughtful Interaction Design A Design Perspective On Information Technology:

Thoughtful Interaction Design Jonas Lowgren, Erik Stolterman, 2007-01-26 The authors of Thoughtful Interaction Design go beyond the usual technical concerns of usability and usefulness to consider interaction design from a design perspective. The shaping of digital artifacts is a design process that influences the form and functions of workplaces, schools, communication, and culture. The successful interaction designer must use both ethical and aesthetic judgment to create designs that are appropriate to a given environment. This book is not a how-to manual but a collection of tools for thought about interaction design. Working with information technology, called by the authors the material without qualities, interaction designers create not a static object but a dynamic pattern of interactivity. The design vision is closely linked to context and not simply focused on the technology. The authors' action-oriented and context-dependent design theory, drawing on design theorist Donald Schön's concept of the reflective practitioner, helps designers deal with complex design challenges created by new technology and new knowledge. Their approach, based on a foundation of thoughtfulness that acknowledges the designer's responsibility not only for the functional qualities of the design product but for the ethical and aesthetic qualities as well, fills the need for a theory of interaction design that can increase and nurture design knowledge. From this perspective, they address the fundamental question of what kind of knowledge an aspiring designer needs, discussing the process of design, the designer's design methods and techniques, the design product, and its qualities and conditions for interaction design.

Hybrid Museum Experiences Annika Waern, Anders Løvlie, 2025-10-01 So you're the one getting this gift. Lucky you. Someone who knows you has visited the museum. They searched out things they thought you would care about, and they took photos and left messages for you. This is the welcoming message for the Gift app, designed to create a very personal museum visit. Hybrid Museum Experiences use new technologies to augment, expand, or alter the physical experience of visiting the museum. They are designed to be experienced in close relation to the physical space and exhibit. In this book, we discuss three forms of hybridity in museum experiences: incorporating the digital and the physical, creating social yet personal and intimate experiences, and exploring ways to balance visitor participation and museum curation. This book reports on a 3-year cross-disciplinary research project in which artists, design researchers, and museum professionals have collaborated to create technology-mediated experiences that merge with the museum environment.

Disentangling Participation Tone Bratteteig, Ina Wagner, 2014-08-07 Providing a critical view on user participation in design disentangling decision making and power in design this book uses fieldwork material from two large participatory design projects one experimental in the field of urban planning the other a product development project within health care Addressing power issues in participatory design is critical to providing a realistic view of the possibilities and limitations of participation Design is decision making during a design process a huge number of decisions taken before the designers end up with a design result an artefact or system All decisions are a choice between possibilities and selecting one of them and making it concrete as a change in an artefact is a demonstration of the capacity to transform which is a key aspect of power Participatory designers are committed to empowering users and facilitating a design process where users are able to take part in all types of decisions This volume explores the challenges for practitioners of participatory design arising from this commitment by asking what participation really means who should participate and in which parts of a design process what does it mean to share power with users how are decisions to be made in a participatory way and what is it that users participate in The book provides a conceptual framework for understanding
