The Power and Use of Thought Charles Webster Leadbeater, 1911 THOSE who are ignorant of Theosophy sometimes suppose it to be merely a system of speculative philosophy Nothing could be farther from the truth than this there is nothing in any way speculative about it for it is founded entirely upon observation of facts and upon experiments made in connection with the phenomena and the forces of Nature From its study emerges a practical rule of life a rule which cannot but affect the thought and action of its students at every moment of their existence This is chiefly because it involves a study of life as it really is so that its students become acquainted with the whole of the world in which they live instead of knowing only the least important part of it They are led to understand the laws of evolution and they naturally learn to live intelligently in accordance with those laws and to take into account the unseen part of the world as well as the infinitesimal portion which is within reach of the limited physical senses
