### **Three Big Bangs:**

Three Big Bangs Holmes Rolston III,2010-10-11 By dividing the creation of matter energy life and mind into three big bangs Holmes Rolston III brings into focus a history of the universe that respects both scientific discovery and the potential presence of an underlying intelligence Matter energy appears initially in simpler forms but with a remarkable capacity for generating heavier elements The size and expansion rate of the universe the nature of electromagnetism gravity and nuclear forces enable the the explosion of life on Earth DNA discovers stores and transfers information generating billions of species Cognitive capacities escalate and with neural sentience this results in human genius A massive singularity the human mind gives birth to language and culture increasing the brain s complexity and promoting the spread of ideas Ideas generate ideals which lead life to take on spirit The nature of matter energy genes and their genesis therefore encourages humans to wonder where they are who they are and what they should do **The Three Big Bangs** Philip M. Dauber, Richard A.

Muller,1997-04-14 Scientists believe that we would not be here it were not for three great cataclysms in the early history of Earth and of the universe This is the first book to explore the deep connection between the events that shaped life on Earth the Big Bang that spawned an entire universe the explosion of a supernova which seeded the solar system with heavy elements and the crash of a comet or asteroid that caused the extinction of the dinosaurs and cleared the way for the evolution of mammals The Three Big Bangs Philip M. Dauber, Richard A. Muller,1996 Scientists identify three Big Bangs

crucial to the creation of the universe beginning with the dinosaur killing collision of Earth and a comet to a massive thermo nuclear star explosion and finally the original Bang believed to have started it all The 21st Century's All New Cosmology Charles J. Sven,1999 *A New Synthesis for Solving the Problem of Psychology* Gregg Henriques,2022-12-10 In this incisive analysis of academic psychology Gregg Henriques examines the fragmented nature of the discipline and explains why the field has had enormous difficulty specifying its subject matter and how this has limited its ability to advance our knowledge of the human condition He traces the origins of the problem of psychology to a deep and profound gap in our knowledge systems that emerged in the context of the scientific Enlightenment To address this problem this book introduces a new vision for scientific psychology called mental behaviorism The approach is anchored to a comprehensive metapsychological framework that integrates insights from physics and cosmic evolution neuroscience the cognitive and behavioral sciences developmental and complex adaptive systems theory attachment theory phenomenology and social constructionist perspectives and is well grounded in the philosophy of science Building on more than twenty years of work in theoretical psychology and drawing on a wide range of literature Professor Henriques shows how this new approach to scientific knowledge fills in the gaps of our current understanding of psychology and can allow us to develop a more holistic and sophisticated way to understand animal and human mental behavioral patterns This work will especially appeal to students and scholars of general psychology and theoretical psychology as well as to historians and philosophers of science The

Heavens Are Telling the Glory of God Laurie Brink, 2022-02-05 2023 Catholic Media Association First Place Award Faith and Science Building on the work of Teilhard de Chardin the New Cosmology integrates scientific facts and theories including discoveries about the expanding universe and evolution and proposes that creation is developing into greater complexity But how are we to understand concepts like original sin and redemption if creation isn't complete and humanity is still in process How does one retrofit religious tradition and Scripture into this scenario Is there room for the historical Jesus in the New Cosmology While a ready concern for all Christians this question has unique implications for women religious whose lives are centered on the person and mission of Jesus Christ How is a Catholic sister to understand her vows of poverty chastity and obedience in light of a cosmology in which the need for redemption and the role of Jesus are significantly redefined The Heavens Are Telling the Glory of God probes these questions and offers possible answers Beginning with the experiences of women religious and their encounter with the New Cosmology or Universe Story this book seeks to mediate among the various perspectives and proposes how informed and reflective engagement with science tradition and theology can bridge the generational divides and foster a spirituality that is both emergent and incarnational Access to online discussion and reflection questions is included

**On Second Thought** Donald W. Shriver, 2010-03-01 In this Don Shriver's fifteenth book the socially involved ethicist and former president of Union Theological Seminary reveals some of the challenging experiences and ideas that have informed his work In a book both personal and honest Shriver reflects on the nature and importance of books music education war friends marriage political conflict and his tenure at Union The essays as a whole represent exemplary theological work by showing how biblical images and themes provided Shriver with both a lens for interpreting his era and a perspective from which to anticipate the future A dominant theme of his work has been the dynamics of forgiveness in human society and the meaning of forgiveness beyond personal life in the relations of groups and nations A final essay a letter to the great grandchildren he will never meet articulates the positive and hopeful message of this wide ranging collection For readers already familiar with his local to global efforts spanning ecumenical racial economic and political justice issues the book offers new insights into how Shriver's life experiences have impacted his work For those not yet familiar with that work the
