Trading Spaces Set:

Trading Spaces Emma Hart, 2024-07-06 Looks at the shift from the marketplace as an actual place to a theoretical idea and how this shaped the early American economy When we talk about the economy the market is often just an abstraction While the exchange of goods was historically tied to a particular place capitalism has gradually eroded this connection to create our current global trading systems In *Trading Spaces* Emma Hart argues that Britain's colonization of North America was a key moment in the market's shift from place to idea with major consequences for the character of the American economy Hart's book takes in the shops auction sites wharves taverns fairs and homes of seventeenth and eighteenth century America places where new mechanisms and conventions of trade arose as Europeans re created or adapted continental methods to new surroundings Since those earlier conventions tended to rely on regulation more than their colonial offspring did what emerged in early America was a less fettered brand of capitalism By the nineteenth century this had evolved into a market economy that would not look too foreign to contemporary Americans To tell this complex transnational story of how our markets came to be Hart looks back farther than most historians of US capitalism rooting these markets in the norms of seventeenth and eighteenth century Britain Perhaps most important this is not a story of specific commodity markets over time but rather is a history of the trading spaces themselves the physical sites in which the grubby work of commerce occurred and where the market itself was born

Trading Economics Zhenying Wang, 2024-05-03 This book reconstructs the theoretical framework of economics by examining the concept of trading the trading network and the evolution of a trading system tied together by the notion of bounded rationality Trading economics uproots the theoretical paradigm of mainstream economics and enables timeworn economic thinking to deal with the various complex phenomena of the modern economy Mainstream economic theories see growth as the combined result of family and enterprise activities Based on this understanding established economic policies all focus on how to effectively influence the behavior of trading agents Trading economics by contrast believes economic growth is the product of the activities of a self organizing network of families and enterprises rather than a simple superposition of the behaviors of trading agents In policy design trading economics looks to maintain the structural integrity of the trading network and the stability of the trading cycle
