

The Syntax and Semantics of Cantonese Particles in the Left Periphery

John C. Wakefield
 Hong Kong Baptist University
 Palacký University Olomouc

Abstract

Adopting the cartographic approach, this paper proposes syntactic positions for all left-periphery particles above the tense phrase (TP) in Cantonese. These include both sentence-final particles and sentence-initial particles that can be used in isolation as interjections. Based on previous syntactic proposals for the left periphery, a modification of Rizzi's (2001) split-complementizer phrase (Split-CP) structure is proposed. A Deictic Phrase (DeicP) is added above the finite phrase (FinP) for the Cantonese "tense" particles *laa3* and *lei4(ge3)*. Then, based on a number of proposals inspired by Speas and Tenny (2003), two functional phrases are added above the force phrase (ForceP) – a higher affect phrase (AffectP) for Cantonese sentence-initial particles and a lower discourse phrase (DiscourseP) for most of the sentence-final particles. The resulting structure is tentatively proposed to account for the word order of all left-periphery particles in Cantonese, bringing the description of their syntax closer in line with a number of proposals based on left-periphery particles in other languages. This proposal includes a three-way distinction of the functions and meanings of left-periphery particles: 1) particles that lie between ForceP and TP do not refer directly to the discourse context; 2) particles that head DiscourseP *do* refer directly to the discourse; and 3) particles that head AffectP refer to the discourse *and* express human emotions.
