## **The Control Trap:**

The Control Trap Barbara Sullivan,1991-04-01 God s Loving Invitation to Women to Rest Rather Than to ControlI meant well I only wanted to fix things and people I thought it was my duty to keep my husband on track and to keep our children from making mistakes and getting hurt I wanted to keep our friends healthy and happy And I was concerned about keeping our spiritual leaders wise But somehow in the process I ended up taking the burden of our world upon my own shoulders I often made the mistake of believing that my will for those I loved must be their highest good And that is where I began to go amiss to lose my peace and to cause unhappiness and conflict for others I was caught in the control trap Sound familiar Being in control is a human way of feeling secure getting problems solved getting things done right But God has called women to a life of trust and ever increasing faith free of debilitating emotions and out of balance relationships It is possible to spiritually break through the control problem and to trust in a Father who never disappoints who holds the whole world in His hands The results are transforming

Trap Responses of Flying Insects R. C. Muirhead-Thompson,2012-12-02 Insect trapping is a basic field research tool for many biologists whether they are studying insect pests disease vectors or insect ecology for its own sake Any field entomologist contemplating a new insect trapping program or looking to improve or develop an existing scheme will benefit from this broad review of flying insect traps in which the author draws on a wide variety of methods used by different research projects from all over the world Over the years a great many traps have been developed and endlessly modified to suit particular species habitats and research requirements In virtually every case the design of the trap interacts with the specific behavior of the insects involved to bias trap efficiency In addition the limited dialogue between workers in different subject disciplines and habitats has caused a shortage of new information available to field entomologists as a whole Describes and evaluates the main methods of trapping flying insects Brings together results from agricultural forest pest studies and those from medical entomology
