Calvin Mercer

The Creation Controversy Science Or Scripture In Schools:

The Creation Controversy Dorothy Nelkin,2000 In 1999 by the board of education in Kansas voted to delete all mention of evolution from the state s recommended science curriculum and also from its educational assessment tests This decision and similar decisions in other states suggest the persistence of creationists and their ability to capture sufficient support to influence educational policies Although evolutionary ideas have become increasing important to many scientific fields the creationists still have significant influence on science curriculum How have religious fundamentalists and right wing conservatives managed to have such influence In this science dominated age why is their such opposition to the teaching of evolution This book places the Kansas decision in the broader context of the controversy between creationists and evolutionists as a group of religious fundamentalists who defined themselves as scientists have challenged the most basic assumptions of contemporary biology Though motivated by religious beliefs they have tried to bypass the Constitutional requirement for the separation of church and state as they seek to influence legislature and school boards Looking at the people involved in this social movement and tracing changes in their arguments and strategies this book links the creation evolution controversy to broader questions about the meaning of religion in a secular science public trust in science and persistent concerns about its social and moral implications

The Creationists Ronald L. Numbers,2006 In light of the embattled status of evolutionary theory particularly as intelligent design makes headway against Darwinism in the schools and in the courts this account of the roots of creationism assumes new relevance This edition offers an overview of the arguments and figures at the heart of the debate

contributors explore the political values and beliefs that underlie decisions about science and technology. The rhetoric and tone have shifted as have the controversies to a growing expression of moral and ideological sentiments. How is public policy formulated in the absence of clear cut agreement on goals? What ethical conundrums are involved when conflicting values are at stake? By studying the controversies presented here students capture a sense of the reasoning that motivates public agencies, government officials, scientists and protest groups. They also have the opportunity to realistically understand science and technical policy, its social and political context and its impact on the individuals on particular communities and on the general public. Controversy will prove stimulating reading for students and professionals in science and technology studies, sociology, political science, health, ethics and peace and conflict studies.

Slaves to Faith Calvin Mercer, 2009-04-30. As Dr Mercer posits, the fundamentalist is fundamentally driven by anxiety layered over a fragile sense of self identity constructed upon a system of beliefs that is both logically inconsistent and highly suspect in light of modern science. As a result, the fundamentalist completely rejects modernity while battling mightily in the arena of national politics and culture to bring about a world that aligns more closely with the fundamentalist worldview. Focusing on Christian fundamentalists, the author puts Christian fundamentalism in its historical and theological contexts. At the same time, Mercer calls upon cognitive theory to explain that the fundamentalist's life story is not particular to Christianity or any other religious belief system but that fundamentalist Catholics, Muslims, Jews and those of all other faiths share a common psychological profile. Indeed, Mercer insists that if the Christian terminology were eliminated from contemporary fundamentalist Christian rhetoric, what would remain would be a framework that fundamentalists from other religions would find quite familiar and even comforting. In other words, the structure of the fundamentalist worldview and the psychology beneath it is pretty much the same across religions. It is a controversial thing to say about Christian fundamentalism, a thesis that has already proved contentious in the author's public appearances and one that is sure to generate considerable attention and passionate debate as the U.S. populace continues to divide into opposing camps.
