The Cybernetic Revolution:

Cybernetic Revolution and Global Aging Leonid Grinin, Anton Grinin, Andrey Korotayev, 2024-05-17 This book explores the global technological transformations that have shaped development of society for eons from the emergence of Homo sapiens to the modern day Looking at a potential future for all of this century and the beginning of the next the book explores how society is changing as a result of the two most powerful trends technological advances and global aging It studies the forthcoming technological wave the Cybernetic Revolution which will encompass AI medical technology and biotechnology robotics cognitive nanotechnology etc In turn it shows why and how global aging will become one of the most powerful factors influencing the evolution of society and the World System as a whole Lastly the book demonstrates how technological innovations can change the way people live and the society of the future assessing both the new opportunities and threats posed by uncontrolled technological progress Accordingly it will appeal to social scientists political scientists economists and historians who are interested in technological transformations and their social and economic impacts [The Cybernetic Revolution and the Forthcoming Epoch of Self-Regulating Systems](#) Grinin, Leonid, Grinin, Anton L., 2016-01-01 The monograph presents the ideas about the main changes that occurred in the development of technologies from the emergence of Homo sapiens till present time and outlines the prospects of their development in the next 30 60 years and in some respect until the end of the twenty first century What determines the transition of a society from one level of development to another One of the most fundamental causes is the global technological transformations Among all major technological breakthroughs in history the most important are three production revolutions 1 the Agrarian Revolution 2 the Industrial Revolution and 3 the Cybernetic one The book introduces the theory of production revolutions which is a new valuable explanatory paradigm that analyzes causes and trends of dramatic shifts in historical process The authors describe the course of technological transformations in history and demonstrate a possible application of the theory to explain the present and forthcoming technological changes They analyze the technological shifts which took place in the second half of the twentieth and early twenty first centuries and forecast the main shifts in the next half a century On this basis the authors present a detailed analysis of the latest production revolution which is denoted as cybernetic They make some predictions about its development in the nearest five decades and up to the end of the twenty first century and show that the development of various self regulating systems will be the main trend of this revolution The authors argue that the transition to the starting final phase of the Cybernetic Revolution in the 2030 2040s will first occur in the field of medicine in some its innovative branches In future we will deal with the started convergence of innovative technologies which will form the system of MANBRIC technologies i e the technological paradigm based on medicine additive nano and bio technologies robotics IT and cognitive technologies The monograph gives an outline of the future breakthroughs in medicine and some other technologies between the 2010s and 2070s [The Cybernetic Revolution](#) John Rose, 1974 [The Cybernetic](#)

Revolution John Rose,1974 Preparing for the Next Cyber Revolution Joseph N. Pelton,2018-12-10 Prepare yourselves for the coming Cyber Revolution Over time humankind has transformed from hunter gatherer to farmer from farmer to industrial worker and from industrial worker to service provider Now we are on the cusp of a fourth transformative wave spurred by climate change exponential population growth and our ever increasing reliance on technology This Copernicus book follows the stream of changes we will likely experience over the next few decades These will involve the design and planning of smart cities and vital new mega cities as well as the use of sophisticated artificial intelligence and knowledge systems in our professional and everyday lives The book shows how the nature of work economics taxation social intercourse and a slew of other global human endeavors will almost certainly undergo fundamental shifts during this time Despite the many crises the world is gearing up to face this book is not all doom and gloom it is a call to action a guide to how we might harness novel technologies in space and cyberspace to address our most urgent needs The Cybernetic Revolution Milton A. Rothman,1972-09 **Economic Cycles, Crises, and the Global Periphery** Leonid Grinin,Andrey Korotayev,Arno Tausch,2016-10-25 This thought provoking monograph analyzes long medium and short term global cycles of prosperity recession and depression plotting them against centuries of important world events Major research on economic and political cycles is integrated to clarify evolving relationships between the global center and its periphery as well as current worldwide economic upheavals and potential future developments Central to this survey are successive waves of industrial and later technological and cybernetic progress leading to the current era of globalization and the changes of the roles of both Western powers and former minors players however that will lead to the formation of the world order without a hegemon Additionally the authors predict what they term the Great Convergence the lessening of inequities between the global core and the rest of the world including the wealth gap between First and Third World nations Among the topics in this ambitious volume Why politics is often omitted from economic analysis Why economic cycles are crucial to understanding the modern geopolitical landscape How the aging of the developed world will affect world technological and economic future p The evolving technological forecast for Global North and South Where the U S is likely to stand on the future world stage Economic Cycles Crises and the Global Periphery will inspire discussion and debate among sociologists global economists demographers global historians and futurologists This expert knowledge is necessary for further research proactive response and preparedness for a new age of sociopolitical change **The Cybernetic Revolution** Robert Anton Wilson,2005 The author reports his impressions after attending a three day Conference on the Cybercultural Revolution an annual conference sponsored by the Institute for Cybercultural Research He suggests that before super machinery even People who Don t Matter were needed by the People Who Matter to till the soil and generally create the support the PWM need Noodles the non technical managers and administrators will also be needed but will be permitted to think they are PWM although they are not He further discusses the need for active or passive feedback to act as a governor on social systems This is an
