Women in the Qur'an, Traditions, and Interpretation Barbara Freyer Stowasser,1996-08-22 Islamic ideas about women and their role in society spark considerable debate both in the Western world and in the Islamic world itself Despite the popular attention surrounding Middle Eastern attitudes toward women there has been little systematic study of the statements regarding women in the Qur'an Stowasser fills the void with this study on the women of Islamic sacred history By telling their stories in Qur'an and interpretation she introduces Islamic doctrine and its past and present socio economic and political applications Stowasser establishes the link between the female figure as cultural symbol and Islamic self perceptions from the beginning to the present time

C.G. Jung and the Crisis in Western Civilization John A Cahman,2020-01-10 The partisan split in American politics is the result of a major transformation of the West as the psychology of the past based on hierarchy and privilege is being replaced by a psychology of equality The status of women and minorities is at the center of this The West's long history of inequality is gradually changing When women's equality is considered symbolically it represents the feminine rising to parity with the masculine a status it has not held since prehistory Minority groups have carried the projected shadow of the White majority for centuries that is gradually ending Integration of the feminine and the shadow are core concepts of C G Jung's psychology of individuation The emerging equality of women and minorities indicates that our group psychology is entering a period of individuation This is a huge change at least as profound as pagan Rome becoming Christian or medieval Europe transitioning into the modern West The turmoil of our time is because of the great historical change as we leave what has been the modern West The turmoil is the widespread appearance of the same conflicts that Jung saw in his patients a century ago The same answer still applies the path Jung realized at the time individuation and it is already beginning to shape our future In this book author John Cahman traces the history of Western Civilization as a developmental process and shows how our time marks a great turning point in that story as we leave an age of sexism racism and hierarchy and enter one of individuation

The Science of Theology; Or the Order of Universal History Established by Scriptural and Historic Data, and Illustrated by a Chart and Tables Robert GREGORY (Author of "The Science of Theology."),1872

The God of Covenant and Creation Larry S. Chapp,2013-05-01 According to Larry Chapp theology is left with two dire options in the aftermath of naturalism's apparent cultural triumph provide modernity with an intellectually cogent theological vision or perish along with that same culture in the wasteland of our nihilism Chapp's important book is grounds for hope that theology may live to see another day and that the pervasive nihilism may not have the last word He correctly diagnoses the intellectual and cultural dangers posed by so called scientific

naturalism lifting the lid on its alleged metaphysical neutrality and exposing this naturalism for what it fundamentally is a bad theology which doesn't know itself. And more importantly still he restores theology to its proper cosmological scope. Not only does creation become intellectually compelling in Chapp's deft hands it elicits wonder and praise for its Creator and restores what is human in us. This is a hopeful development indeed and a sign of an indispensable book. Michael Hanby on back cover

Modernising Protestantism Jo Spaans, 2025-10-01 This book provides a thorough revision of the image of the public church under the Dutch Republic after the Peace of Westphalia and before the onset of the high Enlightenment. Traditional church history considers the seventeenth and eighteenth centuries a period of decline. Yet this was the high tide of Dutch expansion when Dutch society was extremely rich. In its five universities and its highly literate population internationally acknowledged scholarship, arts and sciences flourished. Did really nothing of all this vitality rub off on the public religion? Rather than the traditional static image of a rather joyless and ossified orthodoxy, an exploration of the interface between the Reformed church and Dutch society at large reveals a religious culture that had much to offer to various audiences in the sphere of knowledge production as well as in the form of spiritual solace and everything in between.

Historic Wigtown Richard D. Oram, Paula Martin, Charles McKean, Sue Anderson, 2014 Situated in what now seems a remote corner of south west Scotland Wigtown was once an important county town. With its harbour and location at the lowest fording point of the River Cree Wigtown was at one time part of a major network of land and sea routes including a pilgrim route to Whithorn. The layout of the town is notable for its large market square, a reflection of its importance in the cattle trade in the medieval period. The town achieved burgh status in the thirteenth century by which time it was an important trading centre and the present arrangement of streets and burgh plots dates to this time. Today the principal access route is from the north rather than through the East and West Ports which controlled access to the great market place. The burgh arms depict a three masted

sailing ship demonstrating the importance placed on its maritime trade This book examines both the town s political history as it passed between the earldoms of Wigton and Douglas and its economic history as it competed with Whithorn before its eventual decline in the later nineteenth century The authors use the surviving buildings to examine the development of the town from the medieval to the modern period This book is part of the Scottish Burgh Survey a series funded by Historic Scotland designed to identify the archaeological potential of Scotland s historic towns
