Along with the development of advanced technology nodes, multiple functions and higher level performances of electronic devices, much finer fabrication technologies are required in the manufacture of semiconductor products such as LSI. In this way, higher quality and more timely delivery is also required of photomasks as the masters for semiconductor production.

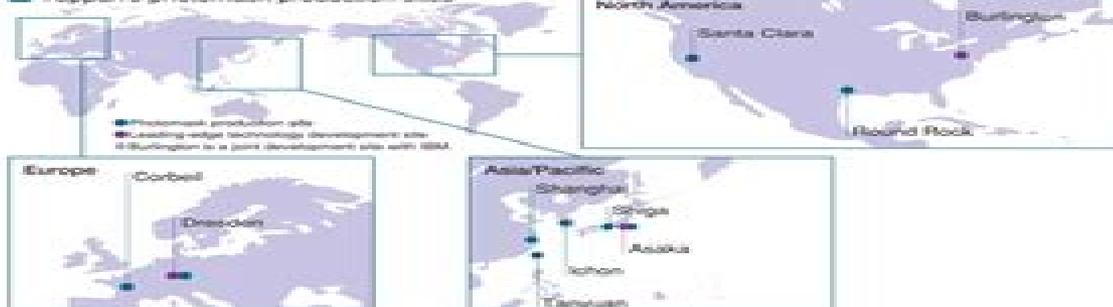

Toppan regards the establishment of leading-edge technologies as one of the most important issues in our management policy. We aim to differentiate our technologies from others by positioning our Asaka Plant (Saitama Prefecture in Japan) and Dresden Plant (Germany) as the base sites for technology development and by concentrating resources such as engineers and equipment to enhance the efficiency of such development.

In addition, we are actively tackling joint development of more extensive technologies with semiconductor manufacturers such as IBM as well as various equipment, material and software manufacturers.

In order to provide the globalizing semiconductor market with prompt and meticulous services, Toppan has a manufacturing network of nine sites throughout the world. It is the world's sole supplier to have manufacturing sites in all of North America, Europe and the Asia/Pacific region.
