Weed-crop Competition Robert L. Zimdahl, 1980 **Effect of Weed-crop Competition on Spectral Reflectance and Physiological Processes as Demonstrated in Corn (Zea Mays)** Inbal Ronay, 2020 Weed crop competition is one of the most severe problems affecting food production leading to significant yield losses in various crops Previous research has been conducted to characterize the spectral response of crops to the stress caused by weeds but not much progress has been achieved nor has this been fully connected to physiological processes This research focuses on corn Zea mays in competition with redroot pigweed Amaranthus retroflexus a common weed that is known to reduce corn yields The research goal was to examine the ability to detect processes related to crop weed competition through proximal and remote sensing and to characterize physiological changes and their effect on spectral reflectance The main hypothesis of this research was that the physiological changes in corn will mainly affect the absorption in the short wavelength infrared SWIR water absorption regions due to competition for water and water stress

From the abstract **Studies of Weed-crop Competition** Bo Li, 1995 **Predicting Crop Phenology** Tom Hodges, 1990-12-26 Predicting Crop Phenology focuses on an analysis of the issues faced in predicting the phenology of crop plants and weeds It discusses how these issues have been handled by active crop growth simulation model developers and emphasizes areas such as the role of modeling in agricultural research and the roles of temperature length of day and water

stress in plant growth This comprehensive text also discusses modeling philosophy and programming techniques in modeling crop development and growth It presents up to date information on phenology models for wheat maize sorghum rice cotton and several weed species Predicting Crop Phenology reviews important data for agricultural engineers plant physiologists agricultural consultants researchers extension agents model developers agricultural science instructors and students

Special Issue Role of Crop Competition in Weed Management Gulshan Mahajan,2017 Plants in Agriculture James C. Forbes,Drennan Watson,1992-08-20 The effective management of plants is fundamental to all agricultural enterprise making plant science a key discipline for all growers This book provides an integrated explanation of all aspects of plant structure and function for students of agriculture horticulture and applied biology with the aim of highlighting the practical relevance of plant science to agriculture Each chapter is self contained and self explanatory with specific chapters covering energy water minerals structure growth and development from sowing to harvest environmental effects and controls breeding vegetative propagation field production and yield and the nutritional content of produce Taken as a whole Plants in Agriculture fulfills the need for a single text which promotes a comprehensive understanding of how plants operate in agriculture

Weed Biology and Management Inderjit,2004-02-29 This book offers a global perspective on weed science by presenting contributions from an outstanding group of researchers in 12 countries reviewed by over 50 experts It discusses technologies which could relieve the negative impacts of weeds on crop production in a way that allows growers to optimise profits and preserve human health and the environment These technologies represent the science of weed management The aim of the book is to provide insight and recent progress in the science of weed research Articles presenting the novel and critical appraisals of specific topics are included Weed-crop Ecology Richard J. Aldrich,1984

Considers weed behaviour and management in the context of ecology and agricultural management Treats weeds taxonomy and evolution crop ecology and the role of weed in allelopathy Discusses the mode of action of herbicides biological cultural and chemical control Provides lists of common and scientific names of weeds and chemical names of herbicides *Some Quantitative Aspects of Weed Competition in Vegetable Crops* Charles Allan Shadbolt,1955 **Weed management in**
