Public Services and the European Union Laura Nistor, 2011-09-15 Politically sensitive and economically important welfare services such as health care health insurance and education have opened up a heated debate in the EU The application of EU law to welfare services raises discontent from the part of the Member States who perceive their systems to be under threat Resisting to the application of the EU law is sometimes seen as part of protecting those values This book suggests that this resistance is

largely unjustified EU law is not damaging to welfare systems but it provides adequate balancing mechanisms to ensure that all interests are protected The approach taken in analysing the impact of EU law on welfare services is to look at the negative integration process and answer the questions related to the extent to which EU law applies to welfare services and the kinds of safeguards the Court offers for these services The proportionality principle distinguishes itself as the central element in balancing national and Community interests Being part of the broader integration process negative harmonization creates legislative lacunae and therefore this book also looks at alternative solutions to the negative harmonization process namely positive and soft law

Globalization, Inequality, and the Commodification of

Life and Well-being Mammo Muchie,Li Xing,2006 Wealth and money which are meant to be sources of human happiness

and facilitators of good social relations has instead become a monstrosity beyond human control The unbridled quest to make money and accumulate wealth as well as assign social signification on the basis of the outcome of individuals efforts in the process has ended up distorting existence and the meaning of being human itself This work brings together a collection of very provocative and challenging articles that confront the problems created by wealth Can there be happiness when wealth is increasingly concentrated in fewer and fewer hands Can wealth really bring happiness And what are the implications of the current trend to commodify everything for the project of human happiness The contributors to the volume argue that there is a need to change wealth accumulation and its core purpose They contend that from wealth accumulation the gear must change to wealth alleviation because the ways the rich become wealthy often correlate with the ways the number of the poor increase Following from this they argue that rather than the current focus on poverty alleviation the focus should shift to wealth alleviation because a happy future for all lies in promoting human well being and removing human ill being through the spring wells of solidarity and humanity
