

Why do birds Migrate?

- ❖ The changing seasons can transform a comfortable environment of a bird into an unlivable one -- the food and water supply can dwindle or disappear, plant cover can vanish, and competition with other animals can increase.

Nature has provided methods for coping with the situation.

Hibernation: involves entering a dormant state during the winter season.

Migration: involves escaping the area entirely. Because of the powers of flight, most birds adapt to seasonal changes in the environment by migrating.
