On the Destiny of Species Matthew Watkinson,2009 Have you really accepted natural selection For those who believe in conservation *On the Destiny of Species* will not make comfortable reading In fact it will challenge you throughout because Life just isn't as fragile as we have been led to believe Yes giant pandas are fragile and yes polar bears are fragile relatively and yes even humans may be fragile but Life isn't about species it's about Life It's about pragmatic survival in a dynamic world Conservation is a hot topic these days Greenpeace Friends of the Earth and the WWF have 10 million members between them but after 30 years of research the author has no doubt that Nature's culling policy is ruthless for a reason and that human emotion is at best misplaced and often specifically detrimental as the domestic species clearly demonstrate Published on the 150th anniversary of *On the Origin of Species* **The Wonderful World of Dogs** Kay White,1983
