Boundary in Hispaniola Paul Mann, Grenville Draper, John F. Lewis, 1991 **The Basins, Orogens and Evolution of the**

Southern Gulf of Mexico and Northern Caribbean I. Davison, J. Hull, J. Pindell, 2021-03-25 This volume brings together 17

comprehensive data rich analyses to provide an updated perspective on the Mexican Gulf of Mexico Florida and northern Caribbean The papers span a broad range of scales and disciplines from plate tectonic evolution to sub basin scale analysis

Papers are broadly categorised into three themes 1 geological evolution of the basins of the southern Gulf of Mexico in

Mexico Bahamas and Florida and their hydrocarbon potential 2 evolution of the region s Late Cretaceous to Neogene orogens

and subsequent denudation history and 3 geological evolution of the basins and crustal elements of the northern Caribbean

This book and its extensive data sets are essential for all academic and exploration geoscientists working in this area Two

large wall maps are included as fold outs Caribbean Basins P. Mann, 1999-12-15 This 21 chapter volume provides a

regionally comprehensive collection of original studies of Caribbean basins conducted by academic and petroleum geologists

and geophysicists in the early and mid 1990s The common tectonic events discussed in the volume including the rifting and

passive margin history of North and South America that led to the formation of the Caribbean region the entry of an exotic

Pacific derived Great Arc of the Caribbean at the leading edge of the Caribbean oceanic plateau the terminal collision of the

arc and plateau with the passive margins fringing North and South America and subsequent strike slip and accretionary

tectonics that affected the arc continent collision zone Two introductory chapters Part A utilize recent advances in

quantitative plate tectonic modeling and satellite based gravity measurements to place the main phases of Caribbean basin

formation into a global plate tectonic framework Nineteen subsequent chapters are organized geographically and focus on

individual or groups of genetically linked basins Part B consists of five chapters which mainly focus on basins overlying the

North America plate in the Gulf of Mexico Cuba and the Bahamas that record its rifting from South America in late Jurassic

to Cretaceous time Part C has six chapters that focus on smaller usually heavily faulted and onshore Cenozoic basins of the

northern Caribbean that formed in response to arc collisional and strike slip activity along the evolving North America

Caribbean plate boundary The two chapters in Part D focus on Cenozoic basins related to the Lesser Antilles arc system of

the eastern Caribbean Part E is comprised of three chapters on the Jurassic Recent sedimentary basins of the eastern Venezuela and Trinidad area of the southeastern Caribbean These basins reflect both the Jurassic Cretaceous rifting and passive margin history of separation between the North and South America plates as well as a much younger phase of Oligocene to recent transpression between the eastward migrating Lesser Antilles arc and accretionary wedge and the South America continent The three chapters of Part F contain deep penetration seismic reflection and other geophysical data on the largely submarine Cretaceous Caribbean oceanic plateau that forms the nucleus of the present day Caribbean plate
