Writing Science Literacy And Discursive Power:

    Writing Science Michael Alexander Kirkwood Halliday,J. R. Martin,1994-06-03 Discusses the evolution of scientific discourse for learning in secondary schools and examines the form and function of language across a variety of levels including lexiogrammar discourse semantics and register genre and ideology Special attention is paid to how this knowledge is imparted   **Reading Science** J.R. Martin,Robert Veel,2005-07-15 Reading Science looks at the distinctive language of science and technology and the role it plays in building up scientific understandings of the world It brings together discourse analysis and critical theory for the first time in a single volume This edited collection examines science discourse from a number of perspectives drawing on new rhetoric functional linguistics and critical theory It explores this language in research and industrial contexts as well as in educational settings and in popular science writing and science fiction The papers also include consideration of the role of images tables and figures in science writing and the importance of reading science discourse as multi modal text The internationally renowned contributors include M A K Halliday Charles Bazerman and Jay Lemke   **The Language of Schooling** Mary J. Schleppegrell,2004-04-26 This book is about how language is used in the context of schooling It demonstrates that the variety of English expected at school differs from the interactional language that students use for social purposes outside of school and provides a linguistic analysis of the challenges of the school curriculum particularly for non native speakers of English speakers of non standard dialects and students who have little exposure to academic language outside of schools The Language of Schooling A Functional Linguistics Perspective builds on current sociolinguistic and discourse analytic studies of language in school but adds a new dimension the framework of functional linguistic analysis This framework focuses not just on the structure of words and sentences but on how texts are constructed how particular grammatical choices create meanings in the different kinds of texts students are asked to read and write at school The Language of Schooling A Functional Linguistics Perspective provides a functional description of the kinds of texts students are expected to read and write at school relates research from other sociolinguistic and language development perspectives to research from the systemic functional linguistics perspective focuses on the increasing linguistic demands of contexts of advanced literacy middle school through college analyzes the genres typically encountered at school with extensive description of the grammatical features of the expository essay a gatekeeping genre for secondary school graduates reviews the grammatical features of disciplinary genres in science and history and argues for more explicit attention to language in teaching all subjects with a particular focus on what is needed for the development of critical literacy This book will enable researchers and students of language in education to recognize how the grammatical and discourse features of the language of schooling construct the content areas role relationships and purposes and expectations of schools It also will enable them to better understand the nature of language itself and how it emerges from and helps to maintain social structures and institutions and to apply these understandings to creating classroom

environments that build on the strengths students bring to school **Researching Language in Schools and Communities** *Researching Language in Schools and Communities* Len Unsworth,2005-11-17 Researching Language in Schools and Communities is designed for those who intend to carry out and or study research in children s language development teaching English as a second language children s literature casual conversation social class and language variation classroom discourse reading processes teaching writing literacy and curriculum area learning critical literacies and related areas The contributors are among the foremost researchers in these fields In this book they introduce approaches to help investigate such areas in applied langauge research using systemic functional linguistics SFL A key purpose of this text is to facilitate the further engagement of language researchers with SFL perspectives encouraging more collaborative transdisciplinary work across different fields of study and theoretical approaches in projects of mutual concern The first two chapters outline the key aspects of SFL descriptions of the relationships between language and social context and the inter related descriptions of text structures and grammatical systems This provides sufficient background to enable those coming new to SFL to make productive critical use of the research reviewed studies described and advice on project design provided in the following chapters Nevertheless the book is an introductory resource and particular attention has been paid throughout to the extensive provision of clear references to more elaborated accounts of the important issues discussed <u>Translation and Ideology</u> Sonia Cunico,2016-04-08 Ideology has become increasingly central to work in translation studies To date however most studies have focused on literary and religious texts thus limiting wider understanding of how ideological clashes and encounters pervade any context where power inequalities are present This special edition of The Translator deliberately focuses on ideology in the translation of a rich variety of lesser studied genres namely academic writing cultural journals legal and scientific texts political interviews advertisements language policy and European Parliament discourse in all of which translation as a social practice can be seen to shape maintain and at times also resist and challenge the asymmetrical nature of exchanges between parties engaged in or subjected to hegemonic practices The volume opens with two ground breaking papers that investigate the nature and representation of truth and knowledge in the translation of the sciences followed by two contributions which approach the issue of shifts in the translation of ideology from the standpoint of critical linguistics and critical discourse analysis using data from political speeches and interviews and from English and Korean versions of Newsweek Other contributions discuss the role that translation scholars can play in raising public awareness of the manipulative devices used in advertising the way in which potentially competing institutional and individual ideologies are negotiated in the context of interpreting in the European Union the role translation plays in shaping the politics of a multilingual nation state with reference to Belgium and the extent to which the concepts of norms and polysystems may be productive in investigating the link between translation and ideology with reference to Chinese data **The Language of Science** M.A.K. Halliday,2004-06-20 The fifth volume of the collected works of Professor M A K Halliday The Language of Science explores

the semantic character of scientific discourse The chapters are organized into two sections one being on grammatical metaphor the other dealing with scientific English In language there exists the potential for constructing new discourses among them scientific discourse The volume opens with a new work from Professor Halliday addressing the question How big is a language It is a question that goes to the heart of the paradigmatic complexity or meaning potential that characterizes language   Science Inquiry, Argument and Language Brian M. Hand,2008 Science Inquiry Argument and Language describes research that has focused on addressing the issue of embedding language practices within science inquiry through the use of the Science Writing Heuristic approach In recent years much attention has been given to two areas of science education scientific argumentation and science literacy The research into scientific argument have adopted different orientations with some focusing on science argument as separate to normal teaching practices that is teaching students about science argument prior to using it in the classroom context while others have focused on embedding science argument as a critical component of the inquiry process The current emphasis on science literacy has emerged because of greater understanding of the role of language in doing and reporting on science Science is not viewed as being separate from language and thus there is emerging research emphasis on how best to improving science teaching and learning through a language perspective Again the research orientations are parallel to the research on scientific argumentation in that the focus is generally between instruction separate to practice as opposed to embedding language practices within the science classroom context   Essays in the Study of Scientific Discourse John T. Battalio,1998-07-20 With contributions by sixteen scholars from such diverse fields as communication linguistics literary studies rhetoric and sociology of sciences Essays in the Study of Scientific Discourse continues the contemporary discussion about the origin and nature of scientific discourse and its function in today s society Essays document the increasing importance of rhetorical expertise in scientific discourse shed new light into the history and language of science and offer pedagogical guidance for teachers of scientific writing Readers may also discover new topics for scholarly research in scientific discourse Gay and Ted Gragson for instance show how technological advances may increase the rhetorical complexity of the grant proposal process while J Harrison Carpenter reveals the rhetorical power of the scientific report In a related study Cynthia Haller shows how scientific claims change as they mover from the scientific to the public arena Dwight Atkinson gives empiricists a new methodology by integrating rhetorical analysis with sociolinguistic methodology Richard Johnson Sheehan and Dan Ding describe the evolution of scientific metaphor and passive voice respectively Ram n Plo Alastru Carmen Ram n Plo Alastru Llantada and Rosemary Horowitz offer advice for teachers of scientific writing while Steven Darian explores the intricacies and argumentative power of scientific classification schemas In turn Philippa Benson gives editorial advice to writers of scientific texts Gender issues in scientific writing are addressed by Christine Skolnik and Mary Rosner Trevor Pinch and Charles Alan Taylor put the cold fusion controversy of 1989 in critical perspective   PRE/TEXT Victor J. Vitanza,1993 This book presents articles reprinted

from the first ten years of the controversial journal PRE TEXT which probes many of the issues instructors in the field of rhetoric and composition face *The Development of Scientific Writing* David Banks,2008-12-01 Winner of the European Society for the Study of English Language and Linguistics Book Award 2010 This book is one of the first applications of a functional approach to language across time It first summarizes and evaluates previous studies of the development of scientific language including Halliday s exploration of this fascinating topic It then traces the development of scientific writing as a genre in terms of its linguistic features from Chaucer s Treatise on the Astrolabe the first technical text written in English almost to the present It goes on to consider texts by major scientists of the late seventeenth century and then analyses and discusses a corpus of texts taken from the Philosophical Transactions of the Royal Society covering the period 1700 to 1980 The main linguistic features studied are the use of passive forms first person pronouns nominalization and thematic structure This brings out the interestingly different patterns of development in the physical and biological sciences It also highlights previously unnoticed effects such as the influence of mathematical modelling on texts in the physical sciences though not interestingly the biological sciences from the late nineteenth century onwards Thus scientific language like virtually all language is intimately related to the context here the field within which it is produced *The 49th Yearbook of the National Reading Conference* Timothy Shanahan,Flora V.
