Stimulating Simulations Charles William Engel, Jane E. Engel, 1977 **Stimulating Simulations** C. William Engel, 1979
Simulations of Decision-Making as Active Learning Tools Peter Bursens, Vincent Donche, David Gijbels, Pieter
Spooren, 2018-03-05 This volume brings together both political and educational scientists While educational research
literature has so far not systematically addressed the tool of simulations of decision making political scientists have hardly
used insights from research on assessment or on motivation and interest of students Almost all political science publications
on simulations merely discuss how to implement the tool in class and fall short of providing evidence of the effects on student
outcomes such as increased interest and performance Combining the two disciplines is mutually enriching Political science
benefits from state of the art educational science measuring and testing of the claims made by the proponents of simulations
while educational sciences adds the systematic analysis of simulations of decision making to their list of empirical objects
which also adds insights to the theories on the affective component of student learning It is the explicit aim of the volume to
address how simulating decision making environments fosters learning Implications for research and practice regarding
student learning are addressed in all chapters Computer Games Blair Carter, 2002 Lists the most significant writings on
