In this book Dennis Unkovic coins the term MaxTrends to identify critical factors and developments that have the potential to derail Xi s aggressive ambitions for China These MaxTrends include alarming demographic shifts cracks in the global supply chain an accelerating global arms race and the Taiwan conundrum all of which indicate that China s strength may be more illusion than reality Unkovic warns that the world s democracies must take increasingly aggressive steps to exploit China s vulnerabilities if they hope to blunt Xi s ambitions Right now China and the United States find themselves competing in a tight race to the top In today s unprecedented arena of economic military and political challenges the nation that acts more quickly and prudently will win   The Role of Legumes in the Farming Systems of the Mediterranean Areas A.E.
