Uncommon Sense For Unreasonable Times:

Uncommon Sense for Unreasonable Times Steve Walrath,2003-04 Behind Time Gerald Rochelle,2018-12-14 First published in 1998 this volume responded to and evaluated criticisms of McTaggart's atemporal philosophy of time. Established philosophical positions on time had positioned themselves in relation to either the A Series past present and future or the B Series earlier and later. McTaggart considered both series untenable and proposed his own atemporal C Series. Beginning with an overview of McTaggart's position, Gerald Rochelle attempts to reinforce the seriousness of and think beyond McTaggart's attempt to describe a world without time through an assessment of McTaggart's criticisms and his suggested alternative. Rochelle argues that McTaggart's atemporal world constitutes a strong foundation for a new theory on time which breaks away from the existing philosophical models of temporality. *The Canada Law Journal* ,1885 Legal Issues Relating to Time Charterparties Rhidian Thomas,2020-11-25 *Legal Issues Relating to Time Charterparties* addresses all the major questions and issues that arise in connection with time charterparties, examining them in a logical manner, progressively tracing the subject from the creation to the termination of the contract. All the salient legal aspects of time charterparties are examined with the law analysed in its commercial context, particularly in relation to the various ways in which time charterparties may be used in shipping and international trade. Annual Report South Dakota. Public Utilities Commission,1907 **The Keystone** ,1919 **The Times Parliamentary Debates** ,1894 *Common Sense in Environmental Management* Jonathan Woolley,2019-09-02 *Common Sense in Environmental Management* examines common sense not in theory but in practice. Jonathan Woolley argues that common sense as a concept is rooted in English experiences of landscape and land management and examines it ethnographically, unveiling common sense as key to understanding how British nature and public life are transforming in the present day. Common sense encourages English people to tacitly assume that the management of land and other resources should organically converge on a consensus that yields self-evident practical results. Furthermore, the English then tend to assume that their own position reflects that consensus. Other stakeholders are not seen as having legitimate but distinct expertise and interests but are rather viewed as being stupid and/or immoral for ignoring self-evident pragmatic truths. Compromise is therefore less likely and land management practices become entrenched and resistant to innovation and improvement. Through a detailed ethnographic study of the Norfolk Broads, this book explores how environmental policy and land management in rural areas could be more effective if a truly common sense was restored in the way we manage our shared environment. Using academic and lay deployments of common sense as a route into the political economy of rural environments, this book will be of great interest to scholars and students of socio-cultural anthropology, sociology, human geography, cultural studies, social history, and the environmental humanities.
