Proceedings of the 2nd UPY International Conference on Education and Social Science (UPINCESS 2023) Ari Kusuma Wardana,2023-12-31 This is an open access book Technology has had a huge

impact on education and social dynamics around the world. Since the introduction of information and communication technologies (ICTs) such as the internet, smartphones, and social media, much has changed in the way we learn and interact with others. In education, technology has enabled students and teachers to access more diverse and engaging educational resources. With internet access, students and teachers can access educational resources from all over the world and learn about various topics and disciplines. In addition, technology also enables distance learning, which allows students and teachers to connect from different locations. However, there are also negative impacts of using technology in education. For example, excessive use of social media and the internet can cause concentration disorders and addiction in students. In addition, too much reliance on technology can also reduce students' ability to think critically and solve problems independently. In social dynamics, technology has allowed us to connect with people from all over the world and paved the way for greater collaboration and cultural exchange. However, technology has also brought negative impacts on social dynamics, such as the spread of fake news or hoaxes, cyberbullying, and social media addiction. In this regard, technology can be a very useful tool if used wisely and with proper understanding of its impact. Therefore, to support this, Universitas PGRI Yogyakarta held an international conference and Call for Papers: The 2nd UPY International Conference on Education and Social Science (UPINCESS) – The Impact of Technology on Education and Social Dynamics on September 27, 2023. The conference aims to discuss in depth about the impact of technology on education and social dynamics, as well as finding appropriate solutions and strategies to minimize its negative impact and maximize its benefits. Experts, researchers, and practitioners in the field of education and technology from around the world can share their knowledge and experience in this conference and can encourage collaboration and innovation in this field.

Machine Learning and Artificial Intelligence Antonio J. Tallón-Ballesteros, Chi-Hua Chen, 2020-12-15. Machine learning and artificial intelligence are already widely applied to facilitate our daily lives as well as scientific research, but with the world currently facing a global COVID-19 pandemic, their capacity to provide an important tool to support those searching for a way to combat the novel coronavirus has never been more important. This book presents the proceedings of the International Conference on Machine Learning and Intelligent Systems (MLIS 2020), which was due to be held in Seoul, Korea, from 25-28 October 2020 but which was delivered as an online conference on the same dates due to COVID-19 restrictions. MLIS 2020 was the latest in a series of annual conferences that aim to provide a platform for exchanging knowledge about the most recent scientific and technological advances in the field of machine learning and intelligent systems. The annual conference also strengthens links within the scientific community in related research areas. The book contains 53 papers selected from more than 160 submissions and presented at MLIS 2020. Selection was based on the results of review and scored on originality, scientific practical significance, compelling logical reasoning, and language. Topics covered include data mining, image processing, neural networks, human health, natural language processing, video processing, computational intelligence, expert systems, human-computer interaction, deep learning,

and robotics Offering a current overview of research and developments in machine learning and artificial intelligence the book will be of interest to all those working in the field *Complex, Intelligent and Software Intensive Systems* Leonard Barolli,2023-06-18 This book aims to deliver a platform of scientific interaction between the three interwoven challenging areas of research and development of future ICT enabled applications software intensive systems complex systems and intelligent systems Software intensive systems are systems which heavily interact with other systems sensors actuators devices other software systems and users More and more domains are involved with software intensive systems e g automotive telecommunication systems embedded systems in general industrial automation systems and business applications Moreover the outcome of web services delivers a new platform for enabling software intensive systems Complex systems research is focused on the overall understanding of systems rather than its components Complex systems are very much characterized by the changing environments in which they act by their multiple internal and external interactions They evolve and adapt through internal and external dynamic interactions The development of intelligent systems and agents which is each time more characterized by the use of ontologies and their logical foundations builds a fruitful impulse for both software intensive systems and complex systems Recent research in the field of intelligent systems robotics neuroscience artificial intelligence and cognitive sciences are very important factor for the future development and innovation of software intensive and complex systems Islamic Sustainable Finance, Law and Innovation Nadia Mansour,Lorenzo Mateo Bujosa Vadell,2023-07-26 This volume discusses the role and characteristics of Islamic finance and how it can contribute to a sustainable financial system Islamic finance is not only for the 1 5 billion Muslims Several countries are interested in it because it has interesting characteristics in terms of transparency and banking regulation Although the origins of Islamic finance date back several centuries its resurgence is relatively recent From its modern beginnings in Egypt and Malaysia Islamic finance is now a growing sector and its recent performance contrasts with that of conventional banks Rapid growth and innovation are transforming the sector driving economic development in an increasing number of jurisdictions while also increasing the number of new opportunities and challenges Today with the problem of climate change and its adverse effects on the whole world the flexibility of Islamic finance concerning the operations available to those who wish to finance the development of infrastructure makes this area crucial for sustainable finance Using Accounting Information , **American Penman** ,1929 Accounting Information Systems Frederick L.
