Atheism Michael Martin,1990 In this book Michael Martin provides logical reasons for being an atheist Carefully examining the current debate in Anglo American analytic philosophy regarding God s existence Martin presents a comprehensive critique of the arguments for the existence of God and a defense of arguments against the existence of God showing in detail their relevance to atheism Claiming that atheism is a rational position while theistic beliefs are not he relies both on logic and evidence and confines his efforts to showing the irrationality of belief in a personal supreme being who is omniscient omnipotent perfect and the creator of heaven and earth The author s approach is two fold By presenting and criticizing arguments that have been advanced in favor of belief he makes a case for negative atheism By offering arguments against atheism and defending it from these attacks he presents a case for positive atheism Along the way he confronts the views of numerous philosophers among them Anselm Aquinas Plantinga Hick and Swinburne and refutes both classical and contemporary arguments that have been advanced through the history of this debate In his conclusion Martin considers what would and would not follow if his main arguments were widely accepted and he defines and distinguishes atheism from other isms and movements Building on the work of religious skeptics and atheists of the past and present he justifies his reconstruction of this philosophical dispute by citing some of the most interesting and important arguments for atheism and criticisms of arguments for the existence of God that have appeared in recent journal articles and have yet to be systematically addressed Author note Michael Martin is Professor of Philosophy at Boston University and author of several books including The Legal Philosophy of H L A Hart A Critical Appraisal and The Case Against Christianity both from Temple

The Works of Orestes A. Brownson: Explanations and index Orestes Augustus Brownson,1887 **Kant's Theory of Knowledge** Georges Dicker,2004 Kant s masterpiece Critique of Pure Reason is universally recognised to be among the most difficult of all philosophical writings and yet it is required reading in almost every course that covers modern philosophy This text is designed for undergraduates to be read alongside the primary text Interval Timing and Time-Based Decision Making Warren H. Meck,Valérie Doyère,Agnes Gruart,2012-05-01 The perception of time is crucial for everyday activities from the sleep wake cycle to playing and appreciating music verbal communication to the determination of the value of a particular behavior With regard to the last point making decisions is heavily influenced by the duration of the various options the duration of the expected delays for receiving the options and the time constraints for making a choice Recent advances suggest that the brain represents time in a distributed manner and reflects time as a result of temporal changes in network states and or by the coincidence detection of the phase of different neural populations Moreover intrinsic oscillatory properties of neural circuits could determine timed motor responses This Research Topic partly an emergence of a Satellite EBBS meeting sponsored by the COST Action TIMELY will discuss how time in the physical world is reconstructed distorted and modified in brain networks by emotion learning and neuropathology This Research Topic on Timing contains up to date
