Department of the Air Force,1967 **The Construction of Metaphoric Text and Talk** Meizhen Liao,2024-08-09 The Construction of Metaphoric Text and Talk A Discourse Analytic Approach argues that in view of their omnipresence in human thinking and action metaphors play a very important role in discourse construction and organization and this role can be textural and textual In order to explore the textual role of metaphors Meizhen Liao proposes that metaphors in discourse be treated as a complex adaptive system CAS which is further composed of two sub systems a micro one consisted of the tenor and the vehicle and a macro one made up of different metaphors The dynamic interaction within the micro system between the tenor and the vehicle in terms of mapping as well as among the macro system of all the metaphors in the text or talk via competition cooperation or complementation contributes to the construction and organization of discourse as an adaptive process in pursuit for the goal or goals of the discourse In the process of the interaction emergent textual patterns develop and an adequate analysis of the patterns at both micro and macro as well as deep and surface levels of discourse will shed light on the true nature and pattern of human thinking and action The author concludes that as metaphor has become entrenched in our conceptual system the study of metaphor as a complex adaptive system in discourse be conducted in its own right

Official Gazette of the United States Patent Office United States. Patent Office,1957 **Official Gazette of the United States Patent and Trademark Office** ,2001 Performance analysis of computer communication networks via random access channels Stanford University Stanford Electronics Laboratories. Digital Systems Laboratory,P. S. Yu,1977 The field of computer communication networks has grown very rapidly in the past few years One way to communicate is via multiple access broadcast channels A new class of random access schemes referred to as the Mp persistent CSMA scheme is proposed It incorporates the nonpersistent CSMA scheme and the 1 persistent CSMA scheme both slotted and unslotted versions as its special cases with p 0 and 1 respectively The performance of the Mp persistent CSMA scheme under packet switching is analyzed and compared with other random access schemes By dynamically adjusting p the unslotted version can achieve better performance in both throughput and delay than the currently available unslotted CSMA schemes under packet switching Furthermore the performance of various random access schemes under message switching is analyzed and compared with that under packet switching In both slotted and unslotted versions of the M0 persistent CSMA scheme the performance under message switching is superior to that under packet switching in the sense that not only the channel capacity is larger but also the average number of retransmissions per successful message under message switching is smaller than that per successful packet under packet switching In dynamic reservation schemes message switching leads to larger channel capacity However in both slotted and unslotted versions of the ALOHA scheme the channel capacity is reduced when message switching is used instead of packet switching This phenomenon may also happen in the Mp persistent

CSMA scheme as p deviates from 0 to 1 for certain distributions of message length Hence the performance under message switching may be superior to or inferior to that under packet switching depending upon the random access scheme being used and the distribution of message length usually a large coefficient of variation of message length implies a large degradation of channel capacity in this case for certain random access schemes Nevertheless for radio channels message switching can achieve larger channel capacity if appropriate CSMA schemes are used A mixed strategy which is a combination of message switching and packet switching is proposed to improve the performance of a point to point computer communication network when its terminal access networks communicate via highly utilized radio channels *Illustrated official journal (patents)* ,1926 *Electronics* ,1945-07 June issues 1941 44 and Nov issue 1945 include a buyers guide section **Wilson & Co., Inc.
