study traces the political history of the ideas underlying Third World calls for a New International Economic Order Filling a significant gap in the literature the book shows that NIEO ideology has a direct unbroken line of development extending back to World War II when a new international economic order the Bretton Woods system was created Dr Murphy maintains that NIEO ideology is not rooted only in Third World acceptance of Prebisch s views on trade rather it evolved from Third World attempts to cope with problems and opportunities that emerged as the Bretton Woods system was created operated and began to break down By the 1970s the ideology had become a complex and coherent analysis of the economic position of Third World states including a political analysis of how Third World views could be made dominant Many of Dr Murphy s conclusions challenge the conventional wisdom about the Third World position of the NIEO In addition his study offers insight into the relatively unexplored area of how changes in political and social consciousness affect international systems and provides grounds on which officials from both the South and the North can see the others views as less alien **Politics**
