**Solving the Anorexia Puzzle** W. Frank Epling, W. David Pierce, 1991      *Activity Anorexia* W. Frank Epling, W. David Pierce, 2013-06-17 This volume provides researchers and clinicians with an insight into recent developments in activity anorexia Much of the basic information on the topic has come from animal literature the theory of activity anorexia is built on an animal model of self starvation rats placed on a single daily feeding run more and more over days stop eating and die of starvation Additionally experiments that for ethical or practical reasons could not be done with humans may be conducted with other animals The animal research is extending the understanding of biologically based reward mechanisms that regulate eating and exercise environment behavior interactions that affect anorexia and the biochemical changes that accompany physical activity and starvation Increasingly however the impact of physical activity on human anorexia is being directly investigated eight out of fourteen research chapters in this volume are based on human research Some researchers are interested in the impact of hyperactivity and caloric restriction on human reproductive function Other authors are investigating physically active subgroups of people considered to be at risk for anorexia Finally several clinician researchers suggest how physical activity and extreme dieting interact for anorexia nervosa patients Chapter authors were asked to present their views independent of the editors argument that when it is present physical activity is central to anorexia Many of the contributors disagree with the editors about the details of activity anorexia A few suggest that excessive physical activity is either incidental to or an epiphenomenon of anorexia Most authors are however in accord with the view that physical activity reduces food consumption which further drives up activity that results in even less caloric intake No matter what their perspective all contributors agree that hyperactivity frequently accompanies self starvation in humans and other animals The end result is a lively book that provides a source of ideas for both researchers and practitioners      Eating Disorders Raymond Lemberg, Leigh Cohn, 1998-12-15 Eating disorders such as anorexia nervosa and bulimia nervosa pose a grave danger to the health of thousands of Americans each year This sourcebook brings together in a single volume an extensive amount of information and resources regarding the diagnosis and treatment of these potentially life threatening conditions This volume is a substantially updated and expanded version of *Controlling Eating Disorders with Facts Advice and Resources* Oryx 1992      **Behavior Analysis and Learning** W. book is unique in that it minimizes the space devoted to abstract discussion of behavior analytic concepts and principles. Instead the authors focus exclusively upon particular cultural practices which are disparate and drawn from three countries ranging from public health practices to historical utopian communities to various practices of visual artists, art dealers and gallery owners. In addition, cultural practices regarding women and the changing Japanese society's effect on Japanese women's behavior are considered. Changes in policies aimed at increasing the birth rate in Quebec are analyzed in behavior analytic terms. The wide range of cultural practices addressed by this book are given coherence by the fact that all are addressed by the various authors in terms of behavior analytic concepts and principles. This book is further confirmation of the fact, unappreciated by some, that a behavior analytic approach can address practices that consist of the behaviors of large numbers of people. The authors demonstrate that the behavior analytic approach is not culture bound. Rather they show that behavior analytic concepts and principles can illuminate human practices in any culture.

Sport and Gender in Canada  
Kevin Young, Philip White, 2007

This contributed volume includes articles on sport and gender written by leading scholars in their areas of expertise. Part I demonstrates that 1) the relationship between sport and gender has not developed in a smooth, uncontested or linear way that always privileges all males and always discriminates against all females and 2) that the relationship between sport and gender can best be understood sociologically by tracing the intersections between sport, gender and other ways that Canadian life has been and remains stratified such as social class, age, race, ethnicity and sexuality. In Chapter 1, Melissa Parker and Philip White explore the chronological development of theoretical frameworks addressing both the gendering of sport and what it means to be gendered in sport. Michael Atkinson argues in Chapter 2 that there is a strong link between types of research methods used and knowledge claims made by researchers. In *Cultural Struggle and Resistance: Gender, History and Canadian Sport*, M. Ann Hall traces the early moments of organized women's sport in Canada to show that women's sport in Canada is built on far stronger foundations than is often assumed. In the following chapter, Kevin Wamsley argues that not all men were privileged by early Canadian sport practices. For instance, he outlines the process through which sport became an arena for the construction of particular types of masculinity, notably masculinities that helped reinforce the dominance of powerful groups of men. Beginning from the premise that Canadian society and thus Canadian sport is far from classless, Peter Donnelly and Jean Harvey provide numerous examples in Chapter 6 to show that there have been major social class and gender inequalities throughout the history of sport. Again, we are reminded that gender is a complex and multidimensional phenomenon that can best be understood if we trace power differences not only between different groups of men and women but also between different versions of masculinity and femininity associated with particular social groups, social classes and social settings. Part II of this book focuses on the work currently being done by leading researchers in the area of sport and gender in Canada on a broad spectrum of sport-related topics. The chapters reflect a variety of theoretical standpoints and methodological procedures. These chapters emphasize the need to study

gender in a way that is not only non categorical but perhaps moves beyond the distributive level towards understanding how sport assumes particular forms at particular historical junctures and grows out of relations of power that are determined culturally and reinforced ideologically In Chapter 6 Sally Shaw and Larena Hoeber show how the prevalence of gendered discourses hinders the achievement of gender equity in Canadian amateur sport organizations The idea that there is no singular masculinity and femininity operating within Canadian sport is developed in Chapter 7 in which Philip White and Kevin Young review research findings on gender and rates and types of sport injury In Chapter 8 Caroline Davis observes that some femininities are more closely associated with body image disorders than others and discusses the biological sociological and psychological factors acting on the relationship between sport physical activity and eating disorders Chapter 9 by Peter Donnelly Who s Fair Game Sport Sexual Harassment and Abuse identifies how power differences tend to exist at the heart of abusive and exploitive sport based relationships Notions of power relations are also central to Chapter 10 written by Patricia Vertinsky and Sandra O Brien Cousins on the effects of gender on participation in sport among older Canadians Specifically their chapter demonstrates how older women are disadvantaged relative to men when it comes to involvement in sport and physical activity Victoria Paraschak s chapter on sport and Canada s First Nations peoples Chapter 11 provides vivid examples of how unequal gender relations are created and reproduced over time Chapter 12 calls for a collapsing of the rigid binary categories of hetero homosexuality on the grounds that these are used to preclude full and equal gay and lesbian participation in sport Identifying patterns of exclusion from participation in sport and physical activity is also the focus of Chapter 13 which is authored by Wendy Frisby Colleen Reid and Pamela Ponc This chapter demonstrates how a combination of poverty and prevailing municipal recreation department policies seriously limit the opportunities of many women from active recreation In Chapter 14 Brian Wilson explores how the media reinforces taken for granted understandings of gender appropriate orientations toward the body and sport In the following chapter Jamie Bryshun and Kevin Young provide some of the first substantial evidence for the routine involvement of female athletes in initiation hazing rituals in Canada and conclude that power relations between neophyte and veteran female players may be just as aggressive coercive and high risk as those occurring on male teams Sport and Gender in Canada reflects a growing body of work highlighting the diversity that exists among Canadian sportswomen and sportsmen in terms of factors such as age race heritage sexuality and social class To speak of a generic sporting masculinity or femininity or indeed of a generic sporting experience simply does not do justice to the complexity of Canadian sporting life
