*Pelvic Pain in Women, An Issue of Obstetrics and Gynecology Clinics* Mary T. McLennan, 2014-09-28 This issue of *Obstetrics and Gynecology Clinics of North America* attempts to provide an overview of the more common causes of chronic pelvic pain in women. It brings together experts in various fields of gynecology, gastroenterology, physical therapy, and urogynecology in an attempt to discuss the wide variety of common clinical conditions that can manifest as pain. The intent is to enable the physician to consider not only the common gynecologic causes but also the common nongynecologic causes based on certain symptom profiles and targeted clinical examination. Should the physician not feel comfortable in treating the nongynecologic causes, it would enable them to target their referral to a more appropriate physician rather than the patient being referred back to a general primary care physician. It is our hope that it will enable the reader to see the pelvis not as an ovary or a uterus but as a whole system of interacting organs, muscles, and nerves. In addition, there is very little in the *Obstetrics and Gynecology* literature about the treatment of the pain component with opioid and nonopioid medications. As one of my colleagues frequently states, we can treat the pain but not necessarily alleviate the suffering. The overview of complementary and alternative medications and opioid use will hopefully be useful to the practicing physician as it provides an evidence-based approach to the use of these therapies specifically for chronic pelvic pain.

**The Overactive Pelvic Floor** Anna Padoa, Talli Y. Rosenbaum, 2015-12-01 This textbook provides a comprehensive state-of-the-art review of the Overactive Pelvic Floor (OPF) that provides clinical tools for medical and mental health practitioners alike. Written by experts in the field, this text offers tools for recognition, assessment, treatment, and interdisciplinary referral for patients with OPF and OPF-related conditions. The text reviews the definition, etiology, and pathophysiology of non-relaxing pelvic floor muscle tone as well as discusses sexual function and past sexual experience in relation to the pelvic floor. Specific pelvic floor dysfunctions associated with pelvic floor overactivity in both men and women are reviewed in detail. Individual chapters are devoted to female genital pain and vulvodynia, female bladder pain and interstitial cystitis, male chronic pelvic and genital pain, sexual dysfunction related to pelvic pain in both men and women, musculoskeletal aspects of pelvic floor overactivity, LUTS and voiding dysfunction, and anorectal disorders. Assessment of the pelvic floor is addressed in distinct chapters describing subjective and objective assessment tools. State-of-the-art testing measures including electromyographic and video urodynamic analysis, ultrasound, and magnetic resonance imaging are introduced. The final chapters are devoted to medical, psychosocial, and physical therapy treatment interventions with an emphasis on interdisciplinary management. The Overactive Pelvic Floor serves physicians in the fields of urology, urogynecology, and gastroenterology, as well as psychotherapists, sex therapists, and physical therapists.
