

5 PILLARS OF READING

These five reading components should be at the core of your reading instruction. Depending on the strengths and needs of your students you might need to dedicate more time to certain pillars than others, but all students need a foundation in these five areas if they are going to be successful readers.

Phonological Awareness

This is a broader term that describes all levels of the speech sound system. Having an awareness of the following concepts: words within sentences, rhyming units within words, beginning, medial, and final sounds within words, syllables within words, and phonemes within words (phonemic awareness). It is a more encompassing and complete term than just phonemic awareness.

Phonics

This refers to the relationship between letters in written language and the individual sounds in spoken language the letters represent. The explicit and systematic teaching of the sound-spelling relationships (phoneme-grapheme relationships) is essential if we want our students to be able to eventually comprehend a text.

Fluency

The ability to automatically read words, phrases, and entire sections of text quickly, accurately, and with understanding. While speed is one element of fluency, it is not the end goal. When we think of fluency, we should think of our students being efficient readers who can apply a variety of word recognition and comprehension skills at the same time.

Vocabulary

The term that describes all the words in a language that are used to understand and communicate. When we think of supporting students' vocabularies, we want to focus on their breadth (the size of their vocabulary), their depth (the richness of words they know), and their fluency (how quickly they can access the meaning of words).

Comprehension

Comprehension is the ultimate goal of reading. When students comprehend a text, they are able to extract meaning and understanding from a written passage when read. There are multiple sub-skills and components necessary (including the other four pillars of reading) in order for students to successfully comprehend a text.
