The German Political Foundations As Actors in Democracy Assistance Alexander Mohr, 2010 In Germany political foundations Stiftungen play an important role in shaping civil society through political democracy education The foundations however have also committed themselves to strengthening democratic political and societal structures abroad Their joint mission abroad is the contribution to democratic structures information and debate in the countries and regions they are working in They complement the official German foreign policy but choose their own priorities and strategies The focus of this thesis is the German political foundations as actors in democracy assistance Democracy assistance focuses less on the aspects of technical assistance but much more on political parties and the promotion of civil society as the backbone of democracy Democracy assistance is a relatively recent international development activity of governments and international organizations In recent years the international community has come to realize the importance of political parties and a well functioning political party system for the process of democratisation Here the German political foundations are working internationally as actors in democracy assistance independent from the German government but at the same time fully state funded The objectives of this dissertation are to understand the work and strategies of the German political foundations as actors in the context of democracy assistance abroad research their partner spectrums on selected countries to identify their shortcomings and to give an outlook of the foundations work in the future in the fast changing global political environment

Networking Peripheries Anita Say Chan, 2024-05-21 An exploration of the diverse experiments in digital futures as they advance far from the celebrated centers of technological innovation and entrepreneurship In *Networking Peripheries* Anita Chan shows how digital cultures flourish beyond Silicon Valley and other celebrated centers of technological innovation and entrepreneurship The evolving digital cultures in the Global South vividly demonstrate that there are more ways than one to imagine what digital practice and global connection could look like To explore these alternative developments Chan investigates the diverse initiatives being undertaken to network the nation in contemporary Peru from attempts to promote the intellectual property of indigenous artisans to the national distribution of digital education technologies to open technology activism in rural and urban zones Drawing on ethnographic accounts from government planners regional free software advocates traditional artisans rural educators and others Chan demonstrates how such developments unsettle dominant conceptions of information classes and innovations zones Government efforts to turn rural artisans into a new

creative class progress alongside technology activists efforts to promote indigenous rights through information tactics plans pressing for the state wide adoption of open source based technologies advance while the One Laptop Per Child initiative aims to network rural classrooms by distributing laptops As these cases show the digital cultures and network politics emerging on the periphery do more than replicate the technological future imagined as universal from the center
