Smith,1993 *Scientific Visualization* Patrizia Palamidese,1993 Illustrating recent developments in the software design and graphics techniques used to visualize scientific concepts this study takes a broad view examining visualization architectures development methods and tools and visualization techniques and algorithms **The Future of Automated Freight Transport** J. W. Konings,Hugo Priemus,Peter Nijkamp,2005 This book explores the many challenges faced by the development and implementation of automated freight transport systems It offers a unique overview of current applications developments and future perspectives The subject of automation is not covered extensively in the existing literature on freight transport and this book aims to fill the gap In view of the increasing difficulties in coping with growing transport volumes in an efficient and sustainable way the development of new automated

freight applications could be a viable alternative The first chapters of the book are devoted to an overview of concepts and current research developments in automated transport outlining the opportunities barriers and threats for further development paths for different transport modes The authors then go on to focus on innovative tools to design and evaluate these new transport developments The book closes with a detailed and critical analysis of what is probably the most critical part of system innovation that is the implementation of automated systems Written from a multi disciplinary perspective which reflects the diversity of the relevant issues needing consideration when designing developing and implementing such systems this book will be an invaluable source for scholars and researchers of innovation and transport studies In addition the book will be useful to policymakers and practitioners involved in the design development and implementation of new technologies for freight transport It may also appeal to wider readers with an interest in the future of freight transport systems
