Star Grazing:

The Stargazing Year Charles Laird Calia, 2006-04 A quarter century after giving up his first telescope Charles Laird Calia lay down one evening on his front lawn with his two young daughters looked up at the stars and rediscovered a childhood passion Part primer on the science and history of astronomical observation part love poem to the night sky *The Stargazing Year* is an amateur astronomer's beautifully written account of a year spent observing the cosmos and building an observatory in his New England backyard What has inspired millions of people over the millennia to sit quietly in the dark studying the stars In twelve chapters spanning the twelve months of the night sky Calia elegantly weaves the history of amateur astronomy and astronomers with a humorous account of his own obsessive quest to build the ideal backyard observatory From Galileo's first telescope to the star-infused poetry of Robert Frost *The Stargazing Year* details the trials and passions that have fueled amateur astronomers for centuries It also sheds light on a vibrant new generation of stargazers who thanks to the affordable equipment available today have made inroads into the study of variable stars and comets that have proven immensely valuable to scientists The story of how one starlit evening the galaxy opened its arms again to one man again *The Stargazing Year* is a paean to the universe and its many mysteries **Looking Up!** Joe Rao, 2017-04-25 Become an expert on the stars in the sky with this fact-tastic nonfiction Level 3 Ready to Read part of a series about the science of fun stuff Did you know that comets are sometimes called hairy stars Or that if you saw a sunset on the moon the sun would look white because the moon doesn't have an atmosphere You'll learn this and much more as you become an expert on the objects in the sky Plus this book contains a special section in the back all about the August 2017 total eclipse of the sun that will be visible throughout most of the United States Amaze your friends with all you've learned in this engaging fact-filled Level 3 Ready to Read There's even a fun quiz so readers can test themselves to see what they've learned Learning science has never been so much fun **The Secret World of Stargazing** Adrian West, 2021-11-25 *The Secret World of Stargazing* is the ultimate guide to set you on your epic journey around the cosmos it's a simple guide to the skies and makes stargazing fun easy and enjoyable for all absolutely no equipment is required Adrian West AKA the internet sensation Virtual Astro will take you through the seasons showing you exactly what you can spot in the sky throughout the year whether you're in your back garden or sitting on an exotic beach somewhere While you're learning how to spot constellations meteors and comets you will be switching off your busy mind sitting still in nature and paying attention to the small details that make up the big picture of life You'll finish reading this beautiful book and come away with a sense of grounding connection knowledge and a whole new appreciation of the sky above and the world outside your own it will soothe your soul *Stargazing for Beginners* Lafcadio Adams, A step by step guide to knowing the night sky Find northern hemisphere constellations easily by starting small and expanding your knowledge This guide is meant to be taken outside Read the instructions and follow along with the stars The only equipment necessary your eyes and a clear night Each lesson builds on

knowledge learned in previous lessons and students of the stars will become comfortable and confident in their ability to identify northern hemisphere constellations accurately

A Stargazing Program for Beginners Jamie Carter, 2015-11-20
Sets out a simple month by month program to reveal all of the night sky's biggest and most beautiful secrets in just one year and with only a few hours of stargazing each month. By investing just an hour a week and 50 in binoculars it's possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever-changing patterns and what they tell us about Earth, the seasons, and ourselves. Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge, science and travel writer Jamie Carter takes the reader on a 12-month tour of the night sky's incredible annual rhythms that say so much about Earth. During the journey he learns about the celestial mechanics at work in the skies above that are to the beginner almost beyond belief. As well as the vital constellations and clusters and the weird and wonderful nebulas he searches out dark sky destinations across the globe that help increase knowledge and give a new perspective on familiar night sky sights. On the journey he witnesses a solar eclipse and grapples with star charts, binoculars, smartphone apps, telescopes, spots satellites, and attempts basic astro photography. By year's end the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing, what time it is, where all the planets are, and even where the Galactic Center Point is.
