

A photograph of a modern architectural complex with white, curved, and angular structures under a clear blue sky. The foreground shows a paved walkway and a small landscaped area with young trees. The background features a tall, slender skyscraper and other modern buildings.

Modern Architecture Examples

What Is Modern Architecture

Otto Wagner

What Is Modern Architecture:

Modern Architecture and Design Bill Risebero, 1983 British architect and planner Bill Risebero recreates 200 years of modern architecture and design against a backdrop of class dominance over rising industrialism The lively and opinionated text and more than 1 000 captioned drawings by the author provide a refreshing reinterpretation of architectural developments in the modern period

Modern Architecture Otto Wagner, 1988 In 1896 Otto Wagner's *Modern Architecture* shocked the European architectural community with its impassioned plea for an end to eclecticism and for a modern style suited to contemporary needs and ideals utilizing the nascent constructional technologies and materials Through the combined forces of his polemical pedagogical and professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the leaders of the revolution soon to be identified as the Modern Movement Wagner's historic manifesto is now presented in a new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the 1896 1898 and 1914 editions In his introduction Dr Harry Mallgrave examines Wagner's tract against the backdrop of nineteenth century theory critically exploring the affinities of Wagner's revolutionary plan with the German eclectic debate of the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity *Modern Architecture* is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era but also perspicaciously and cogently shaped the issues and the course of its development it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century

The Meaning of Modern Architecture Dr Hans Rudolf Morgenthaler, 2015-08-28 Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings This method was first developed as scholars realized that the new abstract art appearing needed to be analysed differently than the previous figurative works Since architecture experienced a similar development in the 1920s and 30s this book argues that the empathetic method can also be used in architectural interpretation While most existing scholarship tends to focus on formal and functional analysis this book proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features Instead by relying on the viewer's innate psycho physiological perceptive abilities sensual and intuitive understandings of composition form and space are emphasized These aspects are especially significant because *Modern Architecture* lacks the traditional stylistic signs Including building analyses it shows how by visually reducing cubical forms and spaces to linear configurations the exteriors and interiors of Modern buildings can be interpreted via human perceptive abilities as dynamic movement systems commensurate with the new industrial transportation age This reveals an

inner necessity these buildings express about themselves and their culture rather than just an explanation of how they are assembled and how they should be used The case studies highlight the contrasts between buildings designed by different architects rather than concentrating on the few features that relate them to the zeitgeist It analyses the buildings directly as the objects of study not indirectly as designs filtered through a philosophical or theoretical discourse The book demonstrates that with technology and science affecting culture and the arts deeply Modern Architecture needs to be treated differently than earlier stylistic periods It proposes a new chronology of Modernity that analyses this period s own evolutionary trajectory and does not try to explain it as simply the last phase in artistic evolution since the beginning of human existence

Principles of Modern Architecture Christian Norberg-Schulz,2000 Principles of Modern Architecture is a clear concise accessible account of what the modern movement really wanted and what it achieved by one of the world s leading architectural critics *Changing Ideals in Modern Architecture, 1750-1950* Peter Collins,1998 Changing Ideals in Modern Architecture revolutionized the understanding of modernism in architecture pushing back the sense of its origin from the early twentieth century to the 1750s and thus placing architectural thought within the a broader context of Western intellectual history This new edition of Peter Collins s ground breaking study includes all seventy two illustrations of the original hard cover edition which has been out of print since 1967 and restores the large format *Modern Architecture and Other Essays* Vincent Scully,2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully s incalculable contribution 300 illustrations **Key Modern Architects** Andrew Higgott,2018-05-31 Key Modern Architects provides an accessible and thought provoking introduction to the work of the most significant architects of the modern era Fifty short chapters introduce fifty key architects from Le Corbusier to Aldo Van Eyck to Zaha Hadid exploring their most influential buildings and developing a critique of each architect s work within a broader cultural and historical context The selection represents the most influential architects working from 1890 to the present those most likely to be taught on survey courses in modern architectural history along with some lesser known names with an equal claim to influence Emphasis is placed on a critical and interpretative approach allowing the student to position each architect in a cultural and intellectual context quickly and easily Artistic technical social and intellectual developments are brought to the fore built and unbuilt projects writings and influences This approach brings to light the ideology behind architectural work offering insights into each architect s working practice Helps students to develop a critical approach to understanding modern architectural history One chapter per architect meaning chapters may be read individually as a concise resource for the study of an architect or together as a coherent book length history of the whole period of modern architecture Chapters are supported by boxed lists of each architect s most significant projects along with suggestions for further reading as a springboard to further study and research Combining the clarity and accessibility of a textbook with in depth reading and a

critical approach Key Modern Architects provides an invaluable resource for both the classroom and for independent study in architectural and art history

Why You Can Build it Like that John Zukowsky,2015 What is the reasoning behind some of the most controversial buildings in the world In this original and engaging study of iconic and iconoclastic modern architecture from the unusual to the truly avant garde John Zukowsky examines the design and purpose of 100 modern buildings and the reaction they provoked when they were built From the work of such world renowned architects as Ludwig Mies van der Rohe Frank Gehry and Zaha Hadid to the maverick creations of Bruce Goff Shin Takamatsu and Shigeru Ban extraordinary buildings are part of our everyday lives but some buildings provoke strong reactions Not in my backyard is a phrase often heard in the discussion of architecture but what is it about these buildings that is so controversial This fascinating study selects 100 iconoclastic buildings that pushed the boundaries of the acceptable when they were built but have since become revered It unravels the complex stories behind their construction placing each building in its cultural context and discussing why it was created and what influence it has had on architectural design You ll discover why some architects choose to prioritize function over aesthetic appeal or vice versa and why others appear to challenge every accepted architectural value You ll also learn how many buildings were influenced by global events such as the Space Race and how others were made possible by timely technological innovation

An Introduction to Modern Architecture James Maude Richards,1940

Modern Architecture Henry Heathcote Statham,1898

Nelson Goodman and Modern Architecture Kasper Lægning,2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman s aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman s aesthetic theory the book explores his conceptual framework within the context of modern architecture At the heart of the investigation lies Goodman s concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman s framework the book aims to address accusations of emptiness and alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

History of Modern Architecture Leonardo Benevolo,1977 A serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author s closely reasoned formulations Let it be said at once that the format of this work is richly handsome it is a two volume boxed set comprising 844 pages and well

over 1 000 high quality illustrations and it reflects throughout its publisher s conviction that good design is an essential not superficial part of bookmaking Beyond that it should be emphasized that this work is not another facile cultural tour of modern architecture It is a serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author s closely reasoned formulations rather than to gloss over a lack of substantive content The book is a translation of the third Italian edition published in 1966 Benevolo who is on the faculty of architecture in Venice has earned an international reputation as a historian of architecture and town planning and his publications embrace the span of time from the Renaissance to the foreseeable future One such publication *The Origins of Modern Town Planning* The MIT Press 1967 may be read as a prelude to the present work as well as an independent contribution Perhaps more than any other architectural historian in our time Benevolo has made a determined effort to place developments in design and planning in their proper social and political settings Indeed the author argues that the development of the modern movement in architecture was determined not by aesthetic formalisms but largely by the social changes that have occurred since about 1760 After the middle of the eighteenth century without the continuity of formal activity being in any way broken indeed while architectural language seems to be acquiring a particular coherence the relations between architect and society began to change radically New material and spiritual needs new ideas and modes of procedure arise both within and beyond the traditional limits and finally they run together to form a new architectural synthesis that is completely different from the old one In this way it is possible to explain the birth of modern architecture which otherwise would seem completely incomprehensible This second volume is concerned with the modern movement proper from 1914 to 1966 The author emphasizes the unity of the movement rejecting the usual treatment that allots to the individual architects separate and unconnected biographical accounts Benevolo remarks at one point When one talks about modern architecture one must bear in mind the fact that it implies not only a new range of forms but also a new way of thinking whose consequences have not yet all been calculated His main concern is to provide a more exact calculation of those consequences

Modern Architecture Since 1900 William J. R. Curtis, 1987 A penetrating analysis of the modern architectural tradition and its origins Since its first publication in 1982 *Modern Architecture Since 1900* has become established as a contemporary classic Worldwide in scope it combines a clear historical outline with masterly analysis and interpretation Technical economic social and intellectual developments are brought together in a comprehensive narrative which provides a setting for the detailed examination of buildings Throughout the book the author s focus is on the individual architect and on the qualities that give outstanding buildings their lasting value For the third edition the text has been radically revised and expanded incorporating much new material and a fresh appreciation of regional identity and variety Seven chapters are entirely new including expanded coverage of recent world architecture Described by James Ackerman of Harvard University as immeasurably the finest work covering this field in existence this book presents a penetrating analysis

of the modern tradition and its origins tracing the creative interaction between old and new that has generated such an astonishing richness of architectural forms across the world and throughout the century

Transformations in Modern Architecture Arthur Drexler, 1979

[The Language of Post-modern Architecture](#) Charles Jencks, 1977 A classic account which when written in 1977 was the first to define post modernism in architecture an event which led to subsequent adoption of the term in many other fields It is the story of the failure of modern architecture to communicate with its users and the attempt of post modernists to overcome this failure with a richer more widely shared language post modern classicism

Google Books

Modern Architecture and the Critical Present Kenneth Frampton, 1982

The Logic of Modern Architecture Randolph Williams Sexton, 1929

The Story of Post-Modernism Charles Jencks, 2011-10-17 In The Story of Post Modernism Charles Jencks the authority on Post Modern architecture and culture provides the defining account of Post Modern architecture from its earliest roots in the early 60s to the present day By breaking the narrative into seven distinct chapters which are both chronological and overlapping Jencks charts the ebb and flow of the movement the peaks and troughs of different ideas and themes The book is highly visual As well as providing a chronological account of the movement each chapter also has a special feature on the major works of a given period The first up to date narrative of Post Modern Architecture other major books on the subject were written 20 years ago An accessible narrative that will appeal to students who are new to the subject as well as those who can remember its heyday in the 70s and 80s

Building-Art Joseph Masheck, 1993-05-28 Building Art Modern Architecture Under Cultural Construction is an anthology of essays by noted critic Joseph Masheck Considering topics in nineteenth and twentieth century architecture its theory and practice as well as selected achievements by such great modernists as Le Corbusier Ludwig Mies van der Rohe and Louis Kahn Masheck also analyzes important monuments and architectural ideas of such artists as Giorgio di Chirico and Tony Smith

Contextualizing and culturally speculative these studies address such issues as the distinction between architecture and mere building and architecture and engineering frequently drawing the reader into architectural problems that have persisted for at least two centuries Demonstrating a concern with on going modernism Masheck s essays guide the reader through the anti modernist polemics of the 1970s and 1980s which are particularly relevant in light of Postmodernism s demise Joseph Masheck editor in chief of Artforum from 1977 1980 is Associate Professor of Art History and coordinator of the graduate humanities program at Hofstra University He is the author of several books and many articles

Guide to Modern Architecture Reyner Banham, 1967
