

# A tight U.S. labor market in 2019 didn't lead to significant gains at the bottom of the income distribution

Real growth in disposable personal income from 2000 to 2019, divided by income category

Source: U.S. Bureau of Economic Analysis, "Distribution of Personal Income" [2021], available at <https://www.bea.gov/data/special-topics/distribution-of-personal-income>.

Note: Top incomes dipped in 2013 due to the expiration of tax cuts enacted in 2001 and 2003. High-income households retimed the realization of income to take advantage of these cuts, resulting in intentionally higher income in preceding years and intentionally lower income in 2013.
