findings of the survey and shows how workers see the future of virtual offices in the next five years It also identifies what things affect this trend the most The paper analyzes the main productivity hindrances that virtual teams face and discusses ways of making remote project collaboration smooth and efficient without regular face to face meetings It offers suggestions to fine tune collaboration across distances *Virtual University?* Henk van der Molen,2001 Higher education institutions around the world are experimenting with many different types of virtual learning environments This book argues that information and communication technologies will have a major impact on teaching and learning and universities should have a strategy to meet this change It posits that institutions and individuals will not be able to individually obtain the best advantages from these new technologies that there is need for specialization and cooperation Experiences with Internet learning indicate that students as well as teachers have to accept patterns quite different from the traditional teaching learning pattern Traditional university staff may resist these changes but institutions which do not adjust to the new opportunities are likely to shrink or even disappear
