Creative Thinking Shuren Wang,2018-05-02 This book identifies that Xiang thinking is the eidetic connotation and a fundamental trait of traditional Chinese thinking offering insights of considerable methodological significance Xiang thinking is a mode of thinking different from conceptual thinking or idealized rational thinking and in a certain sense it is more primal In the past century particularly since 1949 the primary works on Chinese philosophical history have as a rule addressed the ancient Chinese tradition of philosophical ideas by virtue of the philosophies of Plato Descartes and Hegel methods that inherently challenge Chinese philosophical insights This has naturally led to the fact that the insights as such remained obscured This book starts to reverse this trend intending to help Chinese people understand and appraise themselves in a more down to earth fashion In addition it is particularly helpful to people of other cultures if they want to understand ancient Chinese philosophy and culture in a context of fresh and inspiring philosophical ideas By Zhang Xianglong **Asian**
