Working Time In Comparative Perspective:

Working Time Around the World Jon C. Messenger, Sangheon Lee, Deirdre McCann, 2007-05-31 First Published in 2007 Routledge is an imprint of Taylor Francis an informa company *Working Time in Comparative Perspective: Life-cycle working time and nonstandard work*, 2001 **Working Time in Comparative Perspective**, 2001 Working Time in Comparative Perspective: Life-cycle working time and nonstandard work Alice Nakamura, 2001 Eleven contributions from international researchers examine working time over the life cycle and nonstandard work arrangements in the U S and Canada The papers were originally presented at a conference on working time held in Ottawa Ontario in June of 1996 Topics include for example adults returning to school moonlighting self employment for married females the changing use of temporary workers and early retirement c Book News Inc **Working Time in Comparative Perspective - Volume I: Patterns, Trends, and Policy Implications of Earnings Inequality and Unemployment**, 2001 Decent Working Time International Labour Office, 2006 Including international comparative analysis alongside national case studies this volume offers a wealth of information on the new trends which have emerged over the past decades all of which were discussed at the recent 9th International Symposium on Working Time Paris 2004 It looks at the increasing use of results based employment relationships for managers and professionals and the increasing fragmentation of time to more closely tailor staffing needs to customer requirements e g short hours part time work Moreover as operating opening hours rapidly expand toward a 24 hour and 7 day economy the book considers how this has resulted in a growing diversification decentralization and individualization of working hours as well as an increasing tension between enterprises business requirements and workers needs and preferences regarding their hours This new reality has raised some other challenging issues as well and the volume addresses those such as increasing employment insecurity and instability time related social inequalities particularly in relation to gender workers ability to balance their paid work with their personal lives and even the synchronization of working hours with social times such as community activities **Working Time and Workers' Preferences in Industrialized Countries** Jon C. Messenger, 2004-09-09 The gradual reduction in weekly working hours in the first half of the last century which culminated in the widespread adoption of the standard working week by the 1960s was grounded in a concern for health and safety and for the preservation of time outside of paid labour Over the last few decades however this progressive standardization of Collective Bargaining Developments in Times of Crisis Sylvaine Laulom, 2024-12-19 The first edition of this book published in 2018 analysed developments in systems of collective bargaining in fifteen mainly European Union countries related to the post 2008 crisis mixing comparative and national presentations Since then other crises of unprecedented magnitude have hit all countries the totally unexpected COVID 19 pandemic with its massive consequences the energy crisis the environmental crisis and the Ukrainian war crisis followed by inflation However an essential change has taken place at the European level in this area since the publication in 2018 of the first

edition a change of such magnitude that it can be described as a paradigm shift The adoption of the Directive on Adequate Minimum Wages marks a true break with the post financial crisis period as the EU is now focusing on the development and enhancement of strong sectoral collective bargaining systems in wage settings This very new European context justifies an update of the research published in 2018 to analyse the evolutions of collective bargaining in this new context The book is organised around two building blocks Part I presents some comparative perspectives both in terms of the structure of the industrial relations systems and in terms of subjects of collective bargaining whether this be a classical theme of collective bargaining wages and working time or less traditional themes platform work young people and older people which are two categories particularly affected by the crisis Part II presents some national situations Each chapter explores how national systems have been able to respond to European injunctions and have also responded to the new challenges posed by the COVID 19 pandemic and the emergence of new themes These presentations demonstrate once again the extreme diversity of each industrial relations system Some systems such as the Austrian system appear to be unfailingly stable while the Belgian system seems to be having more difficulty adapting Others like the Portuguese or the Spanish systems appear to be resilient while in some countries Turkey Hungary Poland and Romania collective bargaining is particularly weak In these countries the question raised by the adoption of the AMW Directive is therefore to determine how sectoral bargaining can be developed in countries where there is no such level of bargaining or in countries where collective bargaining remains underdeveloped at all levels As the first edition the book takes stock of the current state of collective bargaining in Europe It is an essential study for labour and employment law practitioners and an exemplary analysis of immeasurable value to policymakers and academics in the field
