## Thinking About The Future:

**The Future of Thinking** Peter Washington \*Ga\*, Jeff Mason, Peter Washington, 2005-08-12 Adapts rhetorical exercises such as paraphrase and precis to give students a range of strategies for making sense of texts and encourages the development of practical critical skills in a wide range of humanities students *New Thinking, New Future* Samuel R. Chand, 2019-05-07 The way leaders think matters it matters a lot The problem is that we almost universally make a colossal subconscious assumption that the way we think is the only possible way to consider our situations It's like our minds are running antiquated software that's slow glitchy and unproductive but it's all we've ever known We need to upgrade the software in our heads Sam Chand With candor humor and personal stories Sam peels back the layers of our assumptions to challenge us to think more deeply more clearly and more productively than ever before He addresses fundamental topics all leaders instinctively address including security location ownership team growth and benchmarks of success And he provides questions that leaders can ask themselves to develop **Thinking the Future** Clem Sunter, Mitch Ilbury, 2021-07-01 Do you know how to think about the future All our decisions are about the future whether it's tomorrow next year or the next decade yet our choices are often undermined by desires expectations and common mental mistakes making assumptions worrying about things we can't control missing signals because we're distracted by the noise But if you can learn how to think you can learn how to look ahead Isaac Newton said If I have seen further than others it is by standing on the shoulders of giants In **Thinking the Future** Clem Sunter and Mitch Ilbury teach us the futurist's art of decision making by reimagining seminal concepts from some of history's greatest thinkers They encourage foxy flexible mindsets and reject the popular but misleading self-help tenet that you can decide your fate through the relentless pursuit of a single goal An uncertain world demands a more dynamic approach The point is not to forecast one outcome but to plot multiple scenarios of what could happen Using scenario planning techniques we can all harness the power to work towards the future we want avoid the ones we don't and prepare ourselves for the possible risks and opportunities no matter what transpires *Future Thinking in Roman Culture* Maggie L. Popkin, Diana Y. Ng, 2021-12-30 *Future Thinking in Roman Culture* is the first volume dedicated to the exploration of prospective memory and future thinking in the Roman world integrating cutting edge research in cognitive sciences and theory with approaches to historiography epigraphy and material culture This volume opens a new avenue of investigation for Roman memory studies in presenting multiple case studies of memory and commemoration as future thinking phenomena It breaks new ground by bringing classical studies into direct dialogue with recent research on cognitive processes of future thinking The thematically linked but methodologically diverse contributions all by leading scholars who have published significant work in memory studies of antiquity both cultural and cognitive make the volume well suited for classical studies scholars and students seeking to explore cognitive science and philosophy of mind in ancient contexts with special appeal to those sharing the growing interest in investigating Roman

conceptions of futurity and time The chapters all deliberately coalesce around the central theme of prospection and future thinking and their impact on our understanding of Roman ritual and religion politics and individual motivation and intention This volume will be an invaluable resource to undergraduate and postgraduate students of classics art history archaeology history and religious studies as well as scholars and students of memory studies historical and cultural cognitive studies psychology and philosophy
