## **Writing Word Patterns:**

*How Students Write: A Linguistic Analysis* Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first year student writing. *How Students Write* brings a fresh perspective to this perennial observation using corpus linguistics techniques. This study analyzes sentence level patterns in student writing to develop an understanding of how students present evidence, draw connections between ideas, relate to their readers, and ultimately learn to construct knowledge in their writing. Drawing on both first year and upper level student writing, the book examines the discourse of students at different points in their education. It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students' choices. In focusing on sentence level features such as hedges, perhaps, and boosters, this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas. Attention to these features can help instructors foster civil discourse, design effective assignments, and expose and question norms of higher education. Words and Patterns Katharine M. Day, 1970

*Shaping Literate Minds* Linda Dorn, Carla Soffos, 2023-10-10 How can teachers create a literacy curriculum that builds processing links between reading, writing, and spelling knowledge? In *Shaping Literate Minds: Developing Self-Regulated Learners*, Linda J. Dorn and Carla Soffos illustrate how processing theory can be applied to the everyday practices of classroom teaching. If instruction emphasizes the interrelationships of these three language areas, students learn how to transfer knowledge, skills, and strategies across literacy events. This is complex theory, but the authors provide clear and practical examples to support teachers as they incorporate these ideas into their classroom practices. Grounded in authentic experiences from primary classrooms, this book provides explanations of processing behaviors among reading, writing, and spelling knowledge. Observational tools that support teachers in noticing changes over time in specific literacy behaviors. Guidance on creating conditions for developing self-regulated learners. Authentic reading and writing samples and teacher-student interactions. Figures and pictures that clearly describe how teachers can use assessment to inform and guide instruction with links to national standards. Details for establishing a school-based literacy model that includes team meetings, assessment walls, high standards, and a curriculum for literacy. Appendixes with reproducible assessment checklists, report cards, task cards for literacy corners, and guided reading observation forms for team meetings. With a national emphasis on accountability, high standards, and literacy achievement, *Shaping Literate Minds* will help teachers and administrators implement a high-quality literacy curriculum that links to national and state goals. Mastering High-Frequency Words Joan Westley, 2024-12-31 The 180 lessons in this sequential system of daily word work will help students develop fluency in reading and writing high-frequency words.
